## FOOTNOTES

### Tables 1 and 5

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains three industries where "production" is used instead of shipments. Please see concepts and methods, 7th paragraph for more details.

### Tables 2 to 4

(1) Series which contain no significant seasonality include:

**Raw Materials:**

Rubber Products Industries,
Primary Textile Industries,
Refined Petroleum and Coal Products Industries

**Goods in Process**

Tobacco Products Industries

**Unfilled Orders**

Plastic Products Industries,
Machinery Industries (Except Electrical Machinery)
Transportation Equipment Industries

Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

### Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 7th paragraph.

(2) From January 1983 onwards, the data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

**Note:** Figures may not add due to rounding.

## NOTES

### Tableaux 1 et 5

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.

(2) La valeur des livraisons totales contient trois industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

### Tableaux 2 à 4

(1) Les séries qui sont peu sensibles aux variations saisonnières incluent:

**Matières premières**

Industries des produits en caoutchouc
Industries textiles de première transformation
Industries des produits raffinés du pétrole et du charbon

**Produits en cours**

Industries du tabac

**Commandes en carnet**

Industries des produits en matière plastique,
Industries de la machinerie (sauf électrique)

Industries du matériel de transport

Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

### Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

(2) Depuis janvier 1983, les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

**Nota:** Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

## CONCEPTS AND METHODS

### Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1984 and 1985 Censuses. Values for years prior to 1984 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent census data become available.

For current periods, deaths, when they have been verified, are removed from the sample. Large births are added to the estimates as we become aware of them through press or manufacturing association sources. Small births have a minor impact on manufacturing data and are incorporated during the annual benchmarking process as described above.

Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

## CONCEPTS ET MÉTHODES

### Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient cette publication sont ajustées en fonction des recensement de 1984 et 1985. Les chiffres pour les années jusqu'à 1984 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1985 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes.

Pour les périodes courantes, les disparitions d'entreprises après avoir fait l'objet d'une vérification, sont retirées de l'échantillon. Les créations d'importantes entreprises sont additionnées aux estimations aussitôt que nous connaissons la création de telles entreprises par les médias d'information ou par des sources d'associations manufacturières. Les créations de petites entreprises ont un impact mineur sur les données manufacturières et sont incorporées durant le processus annuel de rajeunissement tel que décrit plus haut.

Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

## Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stock and ships. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

In order to reduce the distortion in the shipments of the three above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

## Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

## Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant et les bateaux. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

Afin de réduire la distorsion qui surviendrait dans les trois industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

## Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

## Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceeding three months are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

## Definitions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

## Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

## Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

## Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

## Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révise les estimations pour les trois mois précédents afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

## Définitions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

## Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z7

## Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

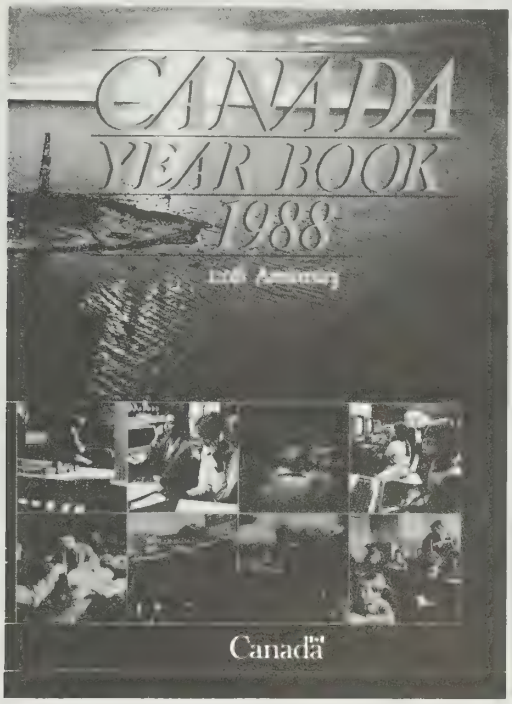
Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

## Mois de dominance cyclique

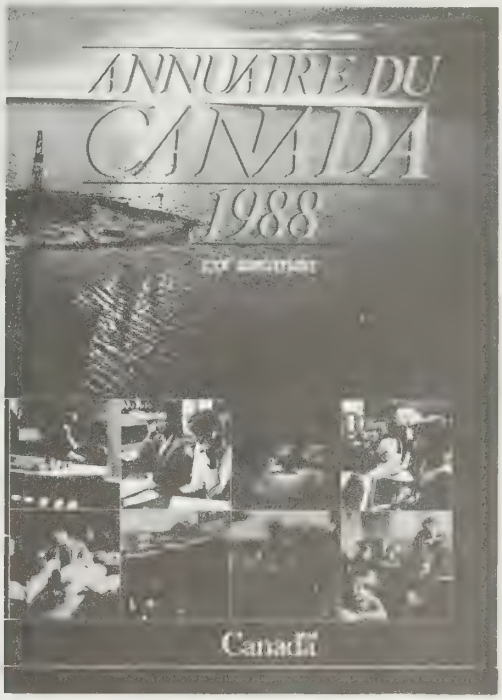
Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

## The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.



The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to sub-divide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.



## Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

# THE CANADA YEARBOOK 1988 L'ANNUAIRE DU CANADA

## A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

$49.95 plus shipping and handling ($54 inclusive in Canada, $70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

## TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada* . Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

$49.95 frais de port et de manutention en sus ($54 au Canada, $70 à l'étranger); numéro 11-402F au répertoire.

# 1986 Census Profiles

# Les Profils du recensement de 1986

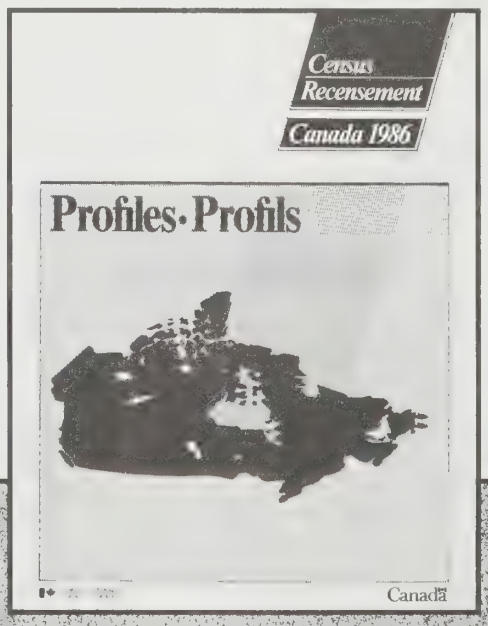
## Your Ticket to any Community in Canada

## Votre laissez-passer pour mieux connaître les Canadiens

The 1986 Profiles will put you on the fast track to any Canadian community you want to study . . .

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you . . . from population counts, to the living arrangements of its elderly.



Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

With 52 publications in this series, we can fast track you to any destination you want.

For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

**Publications Sales**
**Statistics Canada**
**Ottawa, Ontario**
**K1A 0T6**

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?

Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.

Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore

Pour de plus amples renseignements, composez le 1-800-267-6677 et demandez notre brochure, qui vous renseignera sur les modalités de commande. Ou, si vous le préférez, écrivez à:

# TOUT POUR VOUS!
## LES DONNÉES ÉCONOMIQUES ET L'ANALYSE QUE VOUS RECHERCHEZ

**L'Observateur économique canadien:**
Le nouveau bulletin économique mensuel de Statistique Canada

**Aucune autre publication ne vous procure autant de renseignements relatifs à l'économie canadienne**

**Les données du mois**

Des données de dernière heure comprenant toutes les séries de statistiques les plus importantes qui ont été diffusées deux semaines avant la date de publication du bulletin.

**La situation économique actuelle**

Le rendement de l'économie au cours du mois, présenté en bref, comportant une analyse de l'emploi, de la production, de la demande et des principaux indicateurs précurseurs des tendances de l'activité économique.

**Des notes techniques et statistiques**

Des notes portant sur les nouveaux programmes statistiques ou les programmes révisés et sur les progrès en matière de méthodologie propres à Statistique Canada.

**Les principaux événements économiques**

Des événements internationaux et nationaux influençant l'économie canadienne, présentés en ordre chronologique.

**Des études spéciales**

Une recherche approfondie des affaires et des questions d'actualité liées à l'économie.

**Un aperçu statistique**

Des tableaux, des graphiques et des diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi, des marchés financiers, etc.

ET PLUS ENCORE .

**Une analyse régionale**

Des ventilations par province d'indicateurs économiques stratégiques.

**Un survol de l'économie internationale**

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

**Abonnez-vous dès maintenant et économisez!**

Économisez **$40** sur le prix à l'unité de **L'Observateur économique canadien**.

# INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then *Canadian Social Trends* is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, *Canadian Social Trends* looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, *Canadian Social Trends* provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, *Canadian Social Trends* also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

# VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE ?

Alors *Tendances sociales canadiennes* est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, *Tendances sociales canadiennes* brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, *Tendances sociales canadiennes* dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

*Tendances sociales canadiennes* présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

## CANADIAN SOCIAL TRENDS

**April 1988**

**Seasonally Adjusted**

Increases in manufacturing shipments for March and April 1988 have offset most of the decline in February. Despite these increases, there has been no growth on average since November 1987. This contrasts with the strong growth recorded in the preceding eight months. The ratio of inventories to shipments increased in April and new orders returned to more normal levels following a sharp rise in the shipbuilding industry in March 1988.

**HIGHLIGHTS**

- Preliminary estimates indicate that the value of **shipments** increased 0.2% in April to a level of $23.6 billion. This increase, together with a 0.9% increase in March, offset most of the 1.6% decline in February. Durable goods industries were down 0.2% in April, while non-durable goods industries showed an increase of 0.7%.

- After a large increase of 10.3% in March 1988 due to an exceptionally large increase for shipbuilding, **new orders** returned to more normal levels, with an 8.6% decrease in April to $23.8 billion. In the durable goods industries, new orders with an estimated value of $12.2 billion, were 16.0% lower than the March value. In the non-durable goods industries, new orders were valued at $11.6 billion, up 0.8%.

- **Inventories** increased 1.7% to $36.9 billion in April. Increases averaging 0.6% a month over the last seven months have pushed inventories to a new high. The inventories held were up 1.6% to $40.5 billion for the month of April. Increases of 2.1% in raw materials, 2.1% in goods in process and 0.5% in finished products accounted for the rise.

- The **inventories to shipments ratio** was up from 1.54:1 in March to 1.56:1 in April, since the increase in inventories exceeded the rise in shipments. The ratio of finished goods inventory to shipments remained at 0.53:1.

- The **unfilled orders backlog** increased 0.6% in April 1988 to $26.6 billion, following a large 10.2% increase in March, which was due to an exceptionally large increase for shipbuilding. In the durable goods industries, unfilled orders were up 0.7% to $24.4 billion, while non-durable goods industries showed a drop of 1.0% to $2.2 billion.

**Avril 1988**

**Après désaisonnalisation**

Des augmentations en mars et avril 1988 des livraisons manufacturières ont pratiquement annulé la baisse de février. Malgré ces augmentations, il y a eu aucune croissance en moyenne depuis novembre 1987. Cela contraste avec la croissance rigoureuse pour la période de huit mois s'étendant d'avril à novembre 1987. Le rapport des stocks aux livraisons a augmenté en avril et les nouvelles commandes sont revenues à des niveaux plus normaux, après une hausse marquée dans l'industrie de la construction navale en mars 1988.

**FAITS SAILLANTS**

- Des estimations préliminaires indiquent que la valeur des **livraisons** en avril a augmenté de 0.2% pour atteindre $23.6 milliards. Cette augmentation, associée à l'augmentation de 0.9% en mars a annulé pratiquement la baisse de 1.6% en février. Les industries des biens durables étaient en baisse de 0.2% en avril, tandis que les industries des biens non durables montraient une augmentation de 0.7%.

- Après une forte augmentation de 10.3% en mars 1988, causée par une augmentation exceptionnellement marquée de la construction navale, les **nouvelles commandes** sont revenues à des niveaux plus normaux, avec une diminution de 8.6% en avril pour atteindre $23.8 milliards. Dans les industries des biens durables, la valeur estimative des nouvelles commandes était inférieure de 16.0% à la valeur de mars et s'établissait à $12.2 milliards. Les nouvelles commandes des biens non durables ont atteint $11.6 milliards, soit une hausse de 0.8%.

- Les **stocks** ont augmenté de 1.7% pour indiquer $36.9 milliards en avril. Des augmentations atteignant en moyenne 0.6% mensuellement au cours des sept derniers mois, ont contribué à amener les stocks à des niveaux records. Les stocks détenus ont augmenté de 1.6% à $40.5 milliards pour le mois d'avril. Des augmentations de 2.1% dans les matières premières, de 2.1% dans les produits en cours et de 0.5% dans les produits finis ont contribué à cette hausse.

- Le **rapport des stocks aux livraisons** est passé de 1.54:1 en mars à 1.56:1 en avril. Cette hausse est le résultat de l'augmentation plus marquée des stocks comparativement aux livraisons. Le rapport des stocks de produits finis aux livraisons est demeuré à 0.53:1.

- Les **commandes en carnet** ont augmenté de 0.6% en avril 1988 pour atteindre $26.6 milliards, après une forte augmentation de 10.2% en mars. La hausse de mars s'expliquait par l'augmentation exceptionnellement forte de la construction navale. Dans les industries des biens durables, les commandes en carnet ont augmenté de 0.7% à $24.4 milliards, alors que celles des industries des biens non durables ont diminué de 1.0% à $2.2 milliards.

### Unadjusted

- Manufacturers' shipments in April 1988 were estimated at $23.6 billion, 6.3% higher than the April 1987 level.

- Cumulative shipments for the first four months of 1988 were estimated at $93.5 billion, 9.3% higher than the value for the corresponding period in 1987.

### Note to Data Users

With the March 1988 release, the estimated values of shipments, inventories and orders have been revised back to January 1984. These revisions reflect the incorporation of annual benchmarks to the Census of Manufactures. The benchmarking process adjusts the monthly sample estimates in the benchmark years 1984 and 1985 to the annual Census levels, updates the sample, uses new and revised data and re-estimates the seasonal adjustment factors.

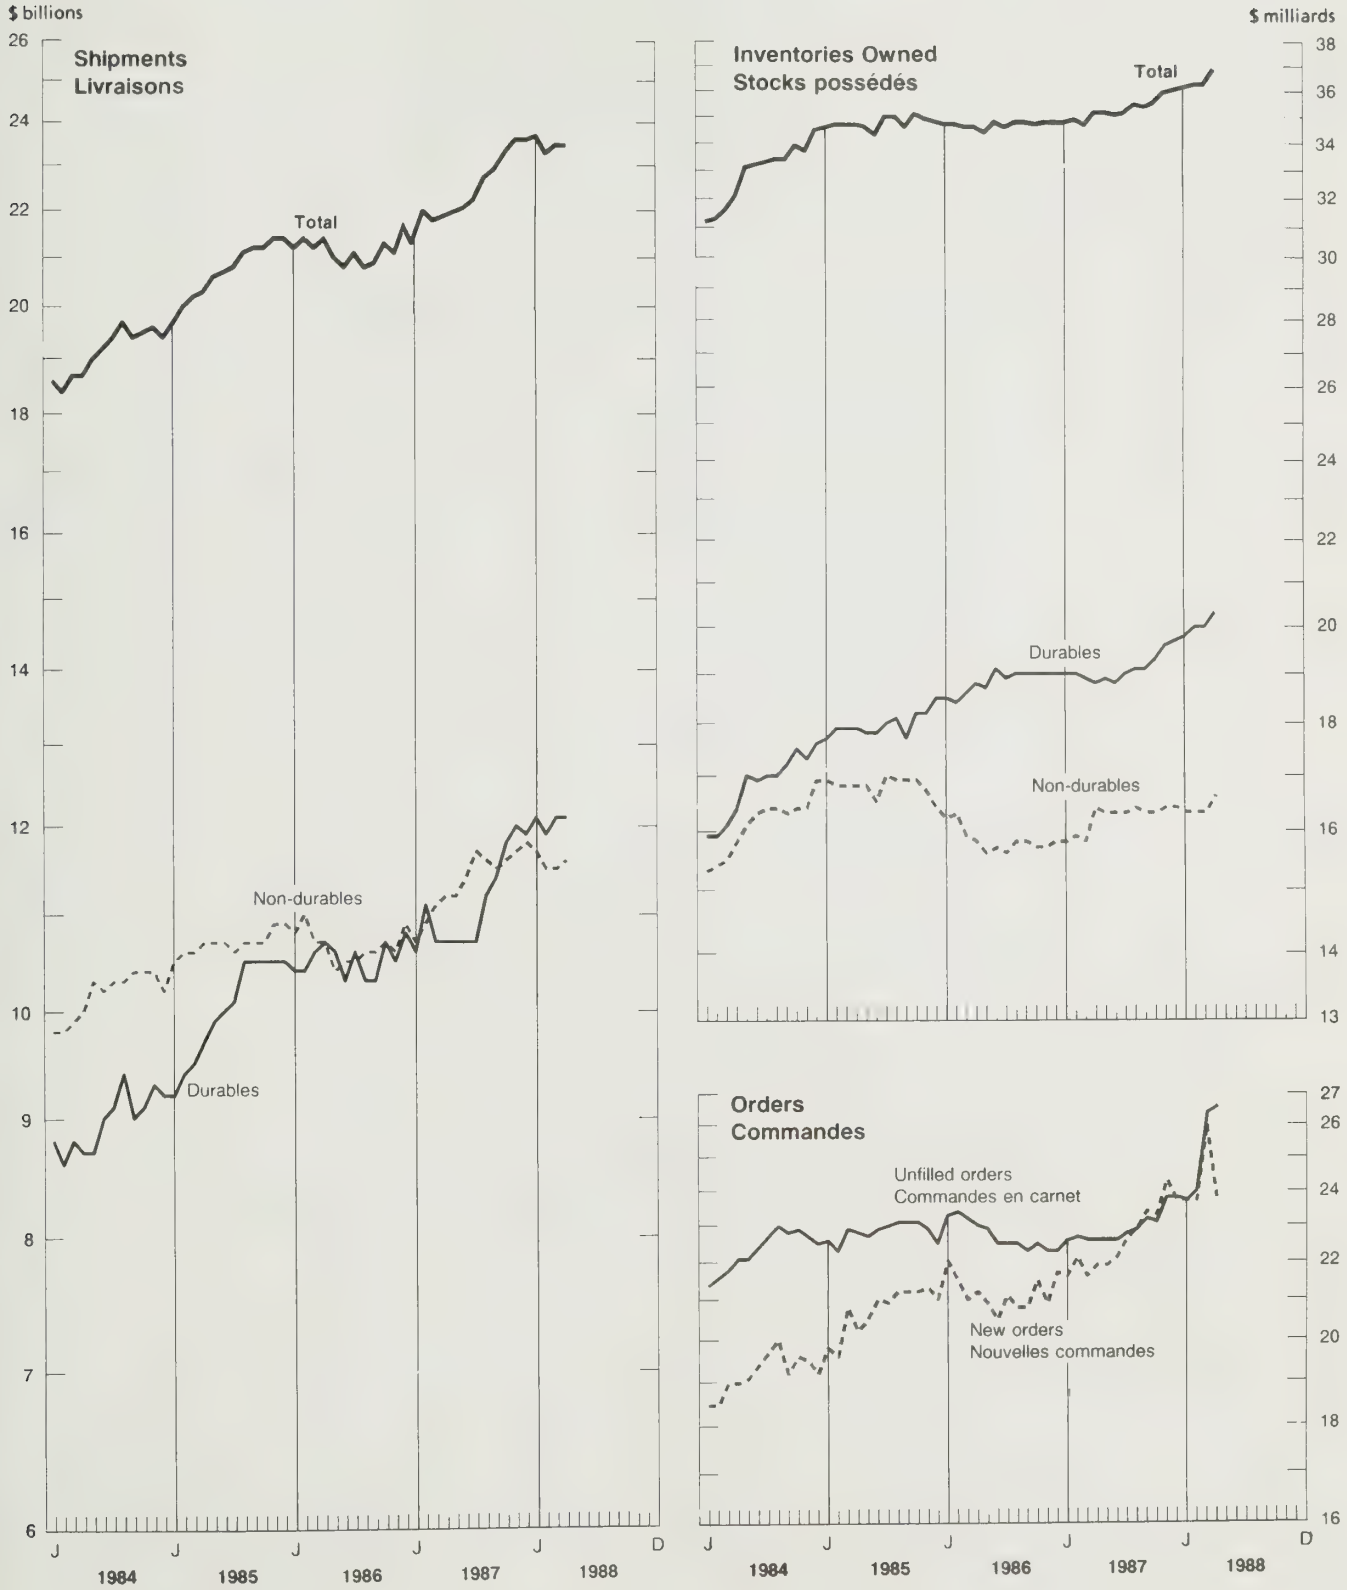
Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

### Avant désaisonnalisation

- On a estimé à $23.6 milliards les livraisons des manufacturiers en avril 1988, ce qui représente une augmentation de 6.3% par rapport au niveau d'avril 1987.

- Pour les quatres premiers mois de 1988, les livraisons estimatives ont totalisé $93.5 milliards, soit un gain de 9.3% par rapport au niveau d'avril 1987.

### Note aux utilisateurs



Débutant avec le communiqué de mars 1988, les valeurs estimatives des livraisons, stocks et commandes ont été révisées jusqu'en janvier 1984. Ces révisions reflètent l'incorporation des données-repères annuelles du recensement des manufactures. L'incorporation de données-repères ajuste les estimations mensuelles de l'échantillon pour les années 1984 et 1985 aux niveaux du recensement annuel, utilise des données nouvelles et revisées; et réestime les facteurs d'ajustement saisonniers.

Les stocks dans le texte ci-haut font référence aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries où des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation avec les travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

## FOOTNOTES

### Tables 1 and 5

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains three industries where "production" is used instead of shipments. Please see concepts and methods, 7th paragraph for more details.

### Tables 2 to 4

(1) Series which contain no significant seasonality include:

**Raw Materials:**

Rubber Products Industries,
Primary Textile Industries,
Refined Petroleum and Coal Products Industries

**Goods in Process**

Tobacco Products Industries

**Unfilled Orders**

Plastic Products Industries,
Machinery Industries (Except Electrical Machinery)
Transportation Equipment Industries

Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

### Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 7th paragraph.

(2) From January 1983 onwards, the data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

**Note:** Figures may not add due to rounding.

## NOTES

### Tableaux 1 et 5

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.

(2) La valeur des livraisons totales contient trois industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

### Tableaux 2 à 4

(1) Les séries qui sont peu sensibles aux variations saisonnières incluent:

**Matières premières**

Industries des produits en caoutchouc
Industries textiles de première transformation
Industries des produits raffinés du pétrole et du charbon

**Produits en cours**

Industries du tabac

**Commandes en carnet**

Industries des produits en matière plastique,
Industries de la machinerie (sauf électrique)

Industries du matériel de transport

Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

### Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ieme paragraphe des concepts et methodes.

(2) Depuis janvier 1983, les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

**Nota:** Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

## CONCEPTS AND METHODS

### Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1984 and 1985 Censuses. Values for years prior to 1984 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent census data become available.

For current periods, deaths, when they have been verified, are removed from the sample. Large births are added to the estimates as we become aware of them through press or manufacturing association sources. Small births have a minor impact on manufacturing data and are incorporated during the annual benchmarking process as described above.

Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

## CONCEPTS ET MÉTHODES

### Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient cette publication sont ajustées en fonction des recensements de 1984 et 1985. Les chiffres pour les années jusqu'à 1984 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1985 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes.

Pour les périodes courantes, les disparitions d'entreprises après avoir fait l'objet d'une vérification, sont retirées de l'échantillon. Les créations d'importantes entreprises sont additionnées aux estimations aussitôt que nous connaissons la création de telles entreprises par les médias d'information ou par des sources d'associations manufacturières. Les créations de petites entreprises ont un impact mineur sur les données manufacturières et sont incorporées durant le processus annuel de rajeunissement tel que décrit plus haut.

Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

## Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stock and ships As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

In order to reduce the distortion in the shipments of the three above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

## Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

## Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant et les bateaux. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

Afin de réduire la distorsion qui surviendrait dans les trois industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

## Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

## Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceeding three months are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

## Definitions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

## Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

## Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

## Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

## Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révise les estimations pour les trois mois précédents afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

## Définitions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

## Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z7

## Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

## Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

## The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to sub-divide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

## Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

# 1986 Census Profiles

# Les Profils du recensement de 1986

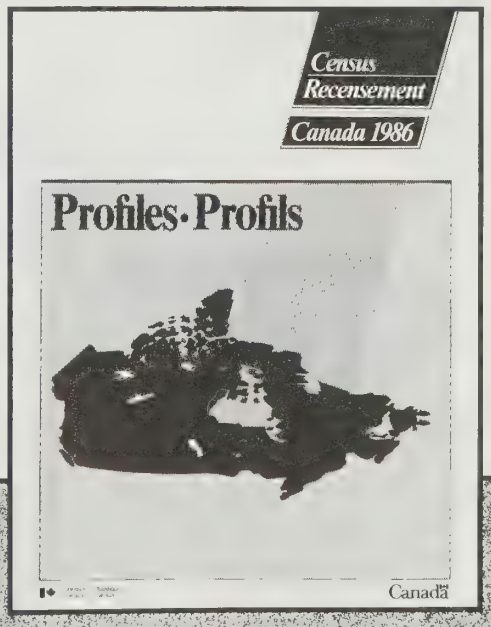
## Your Ticket to any Community in Canada

## Votre laissez-passer pour mieux connaître les Canadiens

The 1986 Profiles will put you on the fast track to any Canadian community you want to study. . .

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you. . . from population counts, to the living arrangements of its elderly.



Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

With 52 publications in this series, we can fast track you to any destination you want.

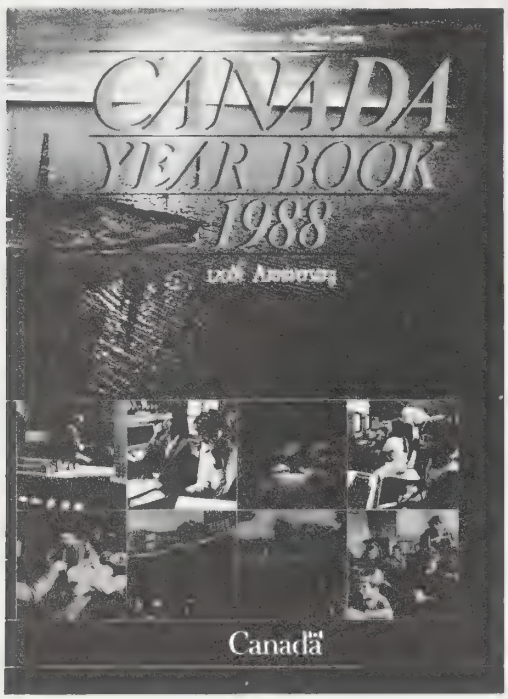
For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

**Publications Sales**
**Statistics Canada**
**Ottawa, Ontario**
**K1A 0T6**

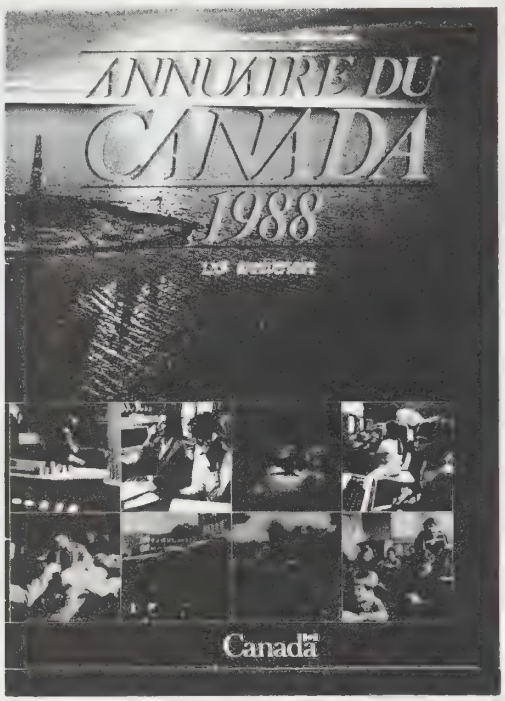
Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?

Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.



Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:



- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore. . .

# THE CANADA YEARBOOK 1988 L'ANNUAIRE DU CANADA

## A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

$49.95 plus shipping and handling ($54 inclusive in Canada, $70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

## TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada* . Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

$49.95 frais de port et de manutention en sus ($54 au Canada, $70 à l'étranger); numéro 11-402F au répertoire.

Pour de plus amples renseignements, communiquez avec le Centre de consultation de Statistique Canada le plus près de chez vous.

# Every week

## The numbers that make decisions

## The data that highlight national economic trends

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat,* Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere).

# Toutes les semaines

## Les chiffres qui font les décisions

## Les données illustrant les tendances de l'économie canadienne

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat,* n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger.

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free.

Please make cheques or money orders payable to the Receiver General for Canada/Publications.

Contact a Regional Reference Centre near you for further information.

Vous pouvez commander en remplissant le bon de commande ci-joint ou en écrivant à Vente des publications, Statistique Canada, Ottawa, Ontario, K1A 0T6. Si vous désirez obtenir un service plus rapide, téléphonez au numéro sans frais et portez votre commande à votre compte Visa ou MasterCard.

Veuillez faire vos chèques ou mandats-poste à l'ordre du Receveur général du Canada-Publications.

Pour obtenir plus de renseignements, n'hésitez pas à communiquer avec le centre de consultation régional le plus près de chez vous.

# INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then *Canadian Social Trends* is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, *Canadian Social Trends* looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, *Canadian Social Trends* provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, *Canadian Social Trends* also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

# VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE ?

Alors *Tendances sociales canadiennes* est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, *Tendances sociales canadiennes* brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, *Tendances sociales canadiennes* dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

*Tendances sociales canadiennes* présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

## CANADIAN SOCIAL TRENDS

Catalogue No. 11-008E is available for $8.00 per copy/$32.00 annually (in Canada); $9.00 per copy/$36.00 annually (elsewhere); students 30% discount from:

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Current Analysis Section,
International and Financial Economics Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9162) or to the Statistics Canada reference centre in:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section de l'analyse de conjoncture,
Division de l'économie internationale et financière,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9162) ou au centre de consultation de Statistique Canada à:

**May 1988**

**Seasonally Adjusted**

For the second time in the past three months, transportation equipment industries were responsible for a sharp rise in new and unfilled orders. In March, shipbuilding accounted for most of the increase, while the May increase was largely due to aircraft and railroad rolling stock industries. New orders and unfilled orders for industries excluding transportation equipment have rebounded slightly, increasing for the second consecutive month following declines in the first quarter of 1988.

The value of shipments for all Canadian manufacturing recorded its largest monthly increase since November 1987, pushing shipments to a record level. This increase follows five months of virtually no growth. Thirteen of the 22 major industry groups recorded increased shipments during May. The largest increases in value were for food, machinery, paper and allied products and fabricated metal products industries.

Inventories continued to increase to record levels. Since shipments continued to keep pace with the growth in inventories, the ratio of inventories to shipments has remained near the same level for the past four months.

**HIGHLIGHTS**

- For the second time in three months, **new orders** rose sharply, increasing 4.2% to a level of $24.8 billion in May 1988. Transportation equipment industries, notably aircraft and railroad rolling stock industries, were responsible for the rise in May. New orders in all manufacturing industries excluding transportation equipment rose for the second consecutive month following four months of declines. In the durable goods industries, new orders, with an estimated value of $13.0 billion, were up 6.0% over the April value. New orders in the non-durable goods industries were valued at $11.9 billion, up 2.3%.

- Following five months of relatively no growth, the value of **shipments** increased 1.4% in May to a record level of $24.0 billion. This increase was the largest monthly increase since November 1987. Durable goods industries increased 0.8% in May while non-durable goods industries were up 1.9%.

**Mai 1988**

**Après désaisonnalisation**

Pour la seconde fois dans les trois derniers mois, les industries du matériel de transport sont responsables pour l'augmentation marquée dans les nouvelles commandes ainsi que pour les commandes en carnet. En mars, la construction navale comptait pour la majorité de l'augmentation, tandis que l'augmentation de mai était due en grande partie aux industries des aéronefs et du matériel ferroviaire roulant. Les nouvelles commandes ainsi que les commandes en carnet pour l'ensemble des industries, excluant le matériel de transport, ont rebondi un peu, augmentant pour le deuxième mois consécutif suivant des diminutions dans le premier trimestre de 1988.

La valeur des livraisons pour l'ensemble des manufacturiers canadiens a enregistré sa plus forte augmentation mensuelle depuis novembre 1987, amenant les livraisons à un niveau record. Cette augmentation fait suite à cinq mois d'absence virtuelle de croissance. Treize des 22 groupes majeurs d'industries ont enregistré une hausse dans leurs livraisons en mai. Les plus fortes augmentations en terme de valeur prenaient place dans les industries des aliments, de la machinerie, du papier et des produits connexes, et dans les industries de la fabrication des produits métalliques.

Les stocks ont continué à augmenter pour atteindre des niveaux records. Comme les livraisons ont continué à suivre le rythme de croissance des stocks, le rapport des stocks aux livraisons est demeuré presqu'au même niveau pour les quatre derniers mois.

**FAITS SAILLANTS**

- Pour la deuxième fois en trois mois, les **nouvelles commandes** se sont accrues fortement, augmentant de 4.2% pour atteindre un niveau de $24.8 milliards en mai 1988. Les industries du matériel de transport, notamment les industries des aéronefs et du matériel ferroviaire roulant sont responsables pour l'augmentation de mai. Les nouvelles commandes dans l'ensemble des industries manufacturières, excluant le matériel de transport, se sont accrues pour un second mois consécutif après quatre mois de baisse. Dans les industries des biens durables, la valeur estimative des nouvelles commandes a augmenté de 6.0% comparée à la valeur d'avril et s'établissait à $13.0 milliards. Les nouvelles commandes des biens non durables ont atteint $11.9 milliards, soit une hausse de 2.3%.

- Faisant suite à cinq mois d'absence virtuelle de croissance, la valeur des **livraisons** a augmenté de 1.4% en mai à un niveau record de $24.0 milliards. Cette augmentation était la plus forte augmentation mensuelle depuis novembre 1987. Les industries des biens durables étaient en hausse de 0.8% en mai, tandis que les industries des biens non durables montraient une augmentation de 1.9%.

- **Inventories** increased 1.1% to $37.4 billion in May. Increases averaging 0.7% a month over the last eight months, have pushed inventories to a new high. Inventories held were valued at $41.1 billion, up 1.2% over April. Increases of 1.8% in both goods in process and finished products and 0.2% in raw materials contributed to the rise.

- The **inventories to shipments ratio** remained at 1.56:1 in May, as the growth in shipments kept pace with the growth in inventories. The ratio of the finished goods inventory to shipments remained at 0.54:1.

- Large increases in transportation equipment industries accounted for most of the 3.0% increase in the **unfilled orders backlog** to push the level to $27.4 billion. Unfilled orders for all industries excluding transportation equipment have shown some improvement over the past two months following declines in two of the first three months in 1988. In the durable goods industries, unfilled orders were up 3.3%, while non-durable goods industries showed a more modest increase of 0.3%.

**Unadjusted**

- Manufacturers' shipments in May 1988 were estimated at $25.3 billion, 11.7% higher than the May 1987 level.

- Cumulative shipments for the first five months of 1988 were estimated at $119.0 billion, 10.0% higher than the value for the corresponding period in 1987.

**Note to Data Users**

With the release of March 1988 data, the estimated values of shipments, inventories and orders were revised back to January 1984. These revisions reflect the incorporation of annual benchmarks to the Census of Manufactures. The benchmarking process adjusts the monthly sample estimates in the benchmark years 1984 and 1985 to the annual Census levels, updates the sample, uses new and revised data and re-estimates the seasonal adjustment factors.

Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

- Les **stocks** ont augmenté de 1.1% à $37.4 milliards en mai. Des augmentations atteignant en moyenne 0.7% mensuellement au cours des huit derniers mois, ont contribué à amener les stocks à des niveaux records. Les stocks détenus s'établissaient à $41.1 milliards, une augmentation de 1.2% par rapport à avril. Des augmentations de 1.8% dans les produits en cours et dans les produits finis et de 0.2% dans les matières premières ont contribué à cette hausse.

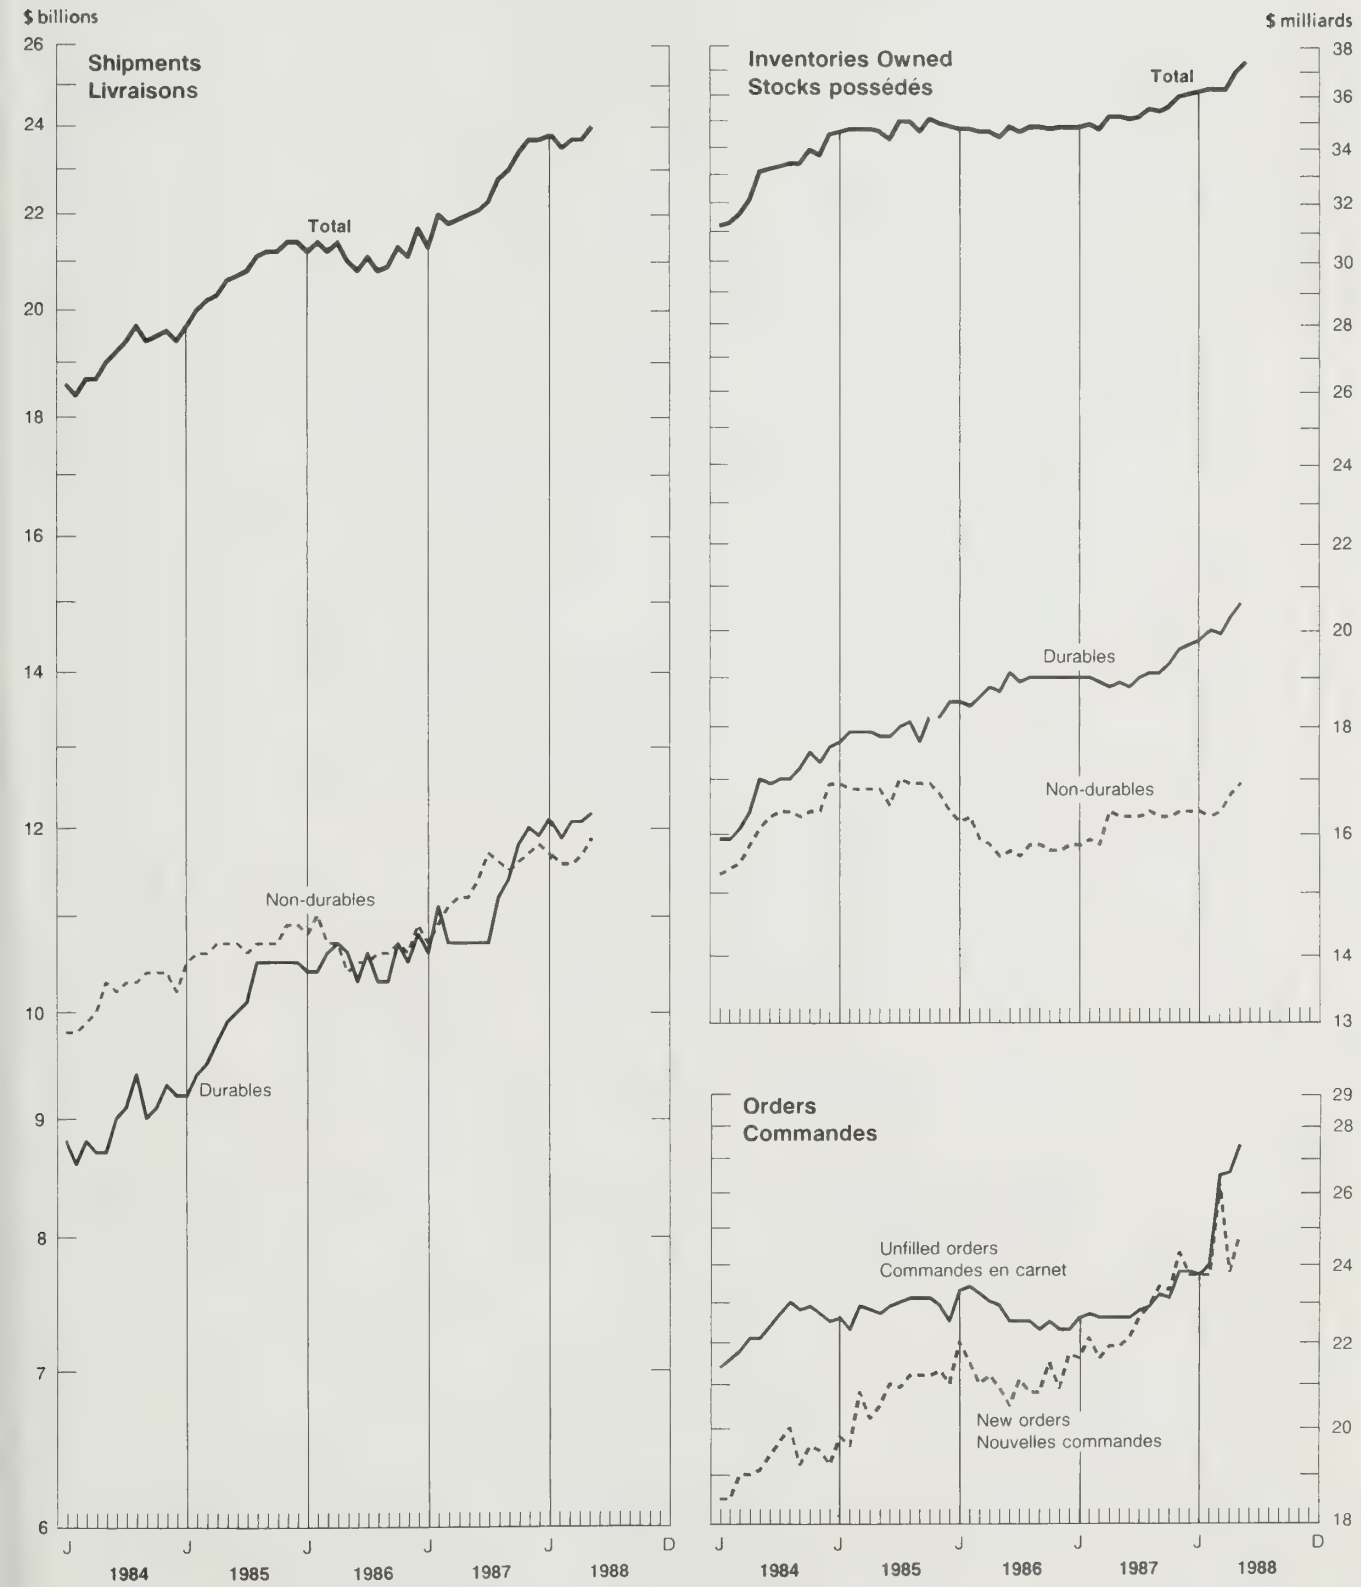
- Le **rapport des stocks aux livraisons** est demeuré à 1.56:1 en mai; puisque la croissance des livraisons a maintenu le même rythme de croissance que les stocks. Le rapport des stocks de produits finis aux livraisons est demeuré à 0.54:1.

- De fortes augmentations dans les industries du matériel de transport étaient responsables de la majeure partie de l'augmentation de 3.0% dans les **commandes en carnet,** amenant le niveau à $27.4 milliards. Les commandes en carnet pour l'ensemble des industries, excluant le matériel de transport, ont montré des améliorations dans les deux derniers mois, suivant des diminutions dans deux des trois premiers mois de 1988. Dans les industries des biens durables, les commandes en carnet ont augmenté de 3.3%, alors que celles des industries des biens non durables montraient une augmentation plus modeste de 0.3%.

**Avant désaisonnalisation**

- On a estimé à $25.3 milliards les livraisons des manufacturiers en mai 1988 ce qui représente une augmentation de 11.7% par rapport au niveau de mai 1987.

- Pour les cinq premiers mois de 1988, les livraisons estimatives ont totalisé $119.0 milliards, soit un gain de 10.0% par rapport à la période correspondante en 1987.



**Note aux utilisateurs**

Débutant avec le communiqué de mars 1988, les valeurs estimatives des livraisons, stocks et commandes ont été révisées jusqu'en janvier 1984. Ces révisions reflètent l'incorporation des données-repères annuelles du recensement des manufactures. L'incorporation des données-repères ajuste les estimations mensuelles de l'échantillon pour les années 1984 et 1985 aux niveaux du recensement annuel, utilise des données nouvelles et révisées, et réestime les facteurs d'ajustement saisonniers.

Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries où des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

## FOOTNOTES

### Tables 1 and 5

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains three industries where "production" is used instead of shipments. Please see concepts and methods, 7th paragraph for more details.

### Tables 2 to 4

(1) Series which contain no significant seasonality include:

**Raw Materials**

Rubber Products Industries,
Primary Textile Industries,
Refined Petroleum and Coal Products Industries

**Goods in Process**

Tobacco Products Industries

**Unfilled Orders**

Plastic Products Industries,
Machinery Industries (Except Electrical Machinery)
Transportation Equipment Industries

Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

### Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 7th paragraph.

(2) From January 1983 onwards, the data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

**Note:** Figures may not add due to rounding.

## NOTES

### Tableaux 1 et 5

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.

(2) La valeur des livraisons totales contient trois industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

### Tableaux 2 à 4

(1) Les séries qui sont peu sensibles aux variations saisonnières incluent:

**Matières premières**

Industries des produits en caoutchouc
Industries textiles de première transformation
Industries des produits raffinés du pétrole et du charbon

**Produits en cours**

Industries du tabac

**Commandes en carnet**

Industries des produits en matière plastique,
Industries de la machinerie (sauf électrique)

Industries du matériel de transport

Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

### Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

(2) Depuis janvier 1983, les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

**Nota:** Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

## CONCEPTS AND METHODS

### Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1984 and 1985 Censuses. Values for years prior to 1984 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent census data become available.

For current periods, deaths, when they have been verified, are removed from the sample. Large births are added to the estimates as we become aware of them through press or manufacturing association sources. Small births have a minor impact on manufacturing data and are incorporated during the annual benchmarking process as described above.

Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

## CONCEPTS ET MÉTHODES

### Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient cette publication sont ajustées en fonction des recensements de 1984 et 1985. Les chiffres pour les années jusqu'à 1984 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1985 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes.

Pour les périodes courantes, les disparitions d'entreprises après avoir fait l'objet d'une vérification, sont retirées de l'échantillon. Les créations d'importantes entreprises sont additionnées aux estimations aussitôt que nous connaissons la création de telles entreprises par les médias d'information ou par des sources d'associations manufacturières. Les créations de petites entreprises ont un impact mineur sur les données manufacturières et sont incorporées durant le processus annuel de rajeunissement tel que décrit plus haut.

Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

## Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stock and ships. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

In order to reduce the distortion in the shipments of the three above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

## Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

## Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant et les bateaux. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

Afin de réduire la distorsion qui surviendrait dans les trois industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

## Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

## Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceeding three months are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

## Definitions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

## Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

## Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

## Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

## Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révise les estimations pour les trois mois précédents afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

## Définitions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

## Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z7

## Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

## Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

## The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to sub-divide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

## Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

# 1986 Census Profiles

# Les Profils du recensement de 1986

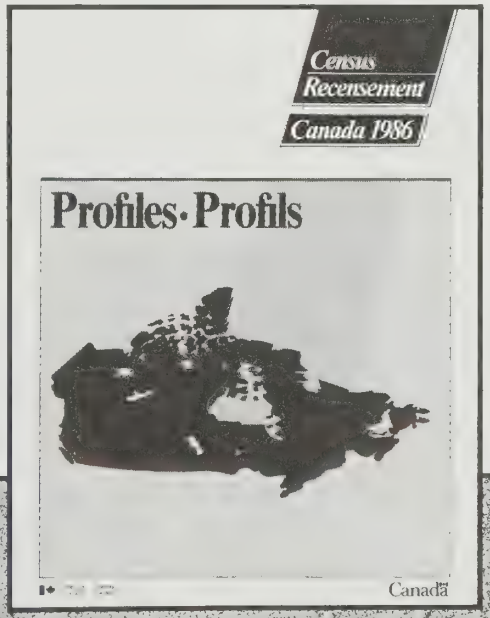
# Your Ticket to any Community in Canada

# Votre laissez-passer pour mieux connaître les Canadiens

The 1986 Profiles will put you on the fast track to any Canadian community you want to study . . .

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you . . . from population counts, to the living arrangements of its elderly.



Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

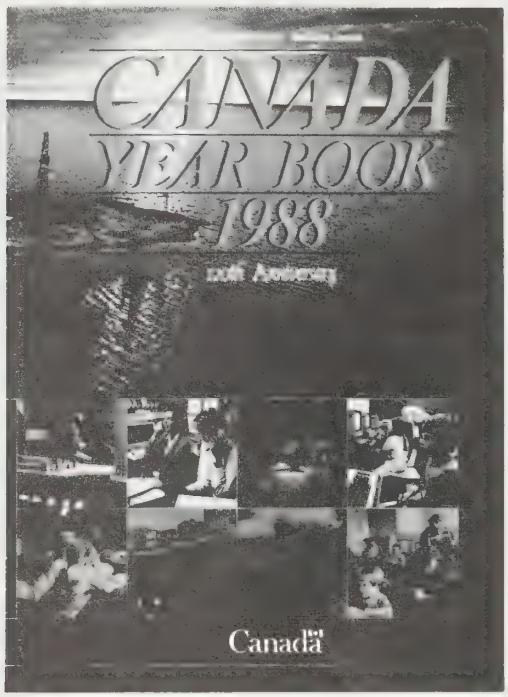
With 52 publications in this series, we can fast track you to any destination you want.

For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

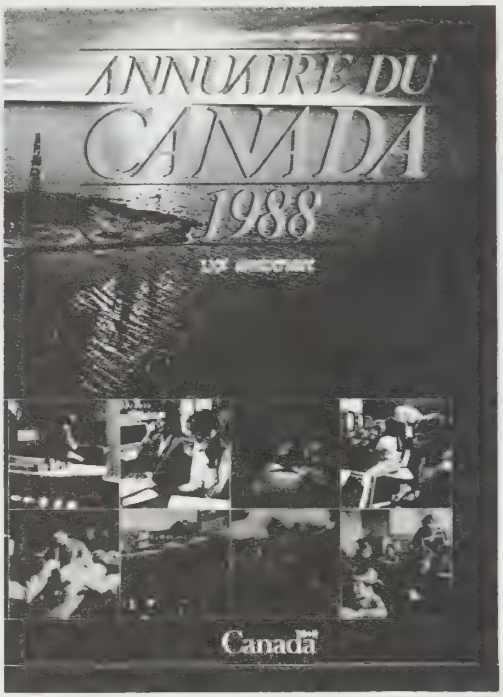
**Publications Sales**
**Statistics Canada**
**Ottawa, Ontario**
**K1A 0T6**

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?



Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.



Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore

Pour de plus amples renseignements, composez le 1-800-267-6677 et demandez notre brochure, qui vous renseignera sur les modalités de commande. Ou, si vous le préférez, écrivez à:

# A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

$49.95 plus shipping and handling ($54 inclusive in Canada, $70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

# TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada* . Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

$49.95 frais de port et de manutention en sus ($54 au Canada, $70 à l'étranger); numéro 11-402F au repertoire.

Pour de plus amples renseignements, communiquez avec le Centre de consultation de Statistique Canada le plus près de chez vous.

# ALL IN ONE PLACE
## THE ECONOMIC FACTS AND ANALYSIS YOU NEED

**Canadian Economic Observer:**
Statistics Canada's New Monthly Economic Report

**No other report on the Canadian economy has this much to offer**

**This month's data**

Up-to-the-minute data includes all major statistical series released two weeks prior to publication.

**Current Economic Conditions**

Brief, "to the point" summary of the economy's performance over the month, including trend analysis of employment, output, demand and leading indicators.

**Statistical and Technical Notes**

Information about new or revised statistical programs and methodological developments unique to Statistics Canada.

**Major Economic Events**

Chronology of international and national events that affect Canada's economy

**Feature Articles**

In-depth research on current business and economic issues.

**Statistical Summary**

Statistical tables, charts and graphs cover national accounts, output, demand, trade, labour and financial markets.

AND MORE . . .

**Regional Analysis**

Provincial breakdowns of key economic indicators.

**International Overview**

Digest of economic performance in Canada's most important trading partners — Europe, Japan, and the U.S.A.

# TOUT POUR VOUS!
## LES DONNÉES ÉCONOMIQUES ET L'ANALYSE QUE VOUS RECHERCHEZ

**L'Observateur économique canadien:**
Le nouveau bulletin économique mensuel de Statistique Canada

**Aucune autre publication ne vous procure autant de renseignements relatifs à l'économie canadienne**

**Les données du mois**

Des données de dernière heure comprenant toutes les séries de statistiques les plus importantes qui ont été diffusées deux semaines avant la date de publication du bulletin.

**La situation économique actuelle**

Le rendement de l'économie au cours du mois, présenté en bref, comportant une analyse de l'emploi, de la production, de la demande et des principaux indicateurs précurseurs des tendances de l'activité économique.

**Des notes techniques et statistiques**

Des notes portant sur les nouveaux programmes statistiques ou les programmes révisés et sur les progrès en matière de méthodologie propres à Statistique Canada.

**Les principaux événements économiques**

Des événements internationaux et nationaux influençant l'économie canadienne, présentés en ordre chronologique.

**Des études spéciales**

Une recherche approfondie des affaires et des questions d'actualité liées à l'économie.

**Un aperçu statistique**

Des tableaux, des graphiques et des diagrammes englobant les statistiques des comptes nationaux, de la production, de la demande, du commerce, de l'emploi, des marchés financiers, etc.

ET PLUS ENCORE

**Une analyse régionale**

Des ventilations par province d'indicateurs économiques stratégiques.

**Un survol de l'économie internationale**

Un sommaire du rendement de l'économie des partenaires commerciaux du Canada, comme l'Europe, le Japon et les États-Unis.

**Abonnez-vous dès maintenant et économisez!**

# Every week

## The numbers that make decisions

## The data that highlight national economic trends

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat,* Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere).

# Toutes les semaines

## Les chiffres qui font les décisions

## Les données illustrant les tendances de l'économie canadienne

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat,* n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger.

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Current Analysis Section,
International and Financial Economics Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9162) or to the Statistics Canada reference centre in:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section de l'analyse de conjoncture,
Division de l'économie internationale et financière,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9162) ou au centre de consultation de Statistique Canada à:

**June 1988**

**Seasonally Adjusted**

Increases in May and June have pushed the value of Canadian manufacturing shipments to new highs following five months of relatively little growth. The June increase in shipments coupled with no change in inventories accounted for a slight decline in the inventories to shipments ratio. The backlog of unfilled orders also continued to rise, reaching a new high.

**HIGHLIGHTS**

- Following five months of relatively little growth, preliminary estimates indicate that the value of **shipments** increased 0.7% in June to a level of $24.1 billion. Increases in May and June have pushed shipments to new highs. Durable goods industries increased 0.3% in June while non-durable goods industries were up 1.3%.

- June **inventories** of $37.2 billion remained at the same level as in May. This contrasts with strong increases averaging 1.4% a month recorded in April and May. Inventories held were valued at $41.0 billion, unchanged from May. An increase of 0.9% in raw materials was offset by decreases of 0.9% in goods in process and 0.2% in finished products.

- The **inventories to shipments ratio** was down from 1.55:1 in May to 1.54:1 in June, as the growth in shipments outpaced the growth in inventories. The ratio of the finished goods inventory to shipments went from 0.54:1 to 0.53:1 in June.

- Relatively strong increases in the last two months have pushed the **unfilled orders backlog** to a new high of $27.8 billion. In the durable goods industries, unfilled orders were up 1.1% to $25.6 billion.

- Following a sharp rise in May, **new orders** declined 1.5% in June to a level of $24.5 billion. Though transportation equipment industries dropped substantially, new orders for the remaining industries showed a strong increase for the third consecutive month.

**Unadjusted**

- Manufacturers' shipments in June 1988 were estimated at $26.0 billion, 9.5% higher than the June 1987 level.

- Cumulative shipments for the first six months of 1988 were estimated at $144.9 billion, 9.8% higher than the value for the corresponding period in 1987.

**Juin 1988**

**Après désaisonnalisation**

Des augmentations en mai et juin ont amené la valeur des livraisons manufacturières à de nouveaux sommets, après cinq mois de croissance relativement très faible. L'augmentation des livraisons en juin, combinée à un niveau inchangé des stocks, a entraîné une légère baisse dans le rapport des livraisons aux stocks. Les commandes en carnet ont également continué à augmenter pour atteindre un nouveau sommet.

**FAITS SAILLANTS**

- Après cinq mois de croissance relativement très faible, des données préliminaires indiquent que la valeur des **livraisons** a augmenté de 0.7% en juin pour indiquer un niveau de $24.1 milliards. Des augmentations en mai et juin ont amené les livraisons à de nouveaux sommets. Les industries des biens durables ont augmenté de 0.3% en juin, tandis que les industries des biens non durables se sont accrues de 1.3%.

- Les **stocks** en juin qui se situent à $37.2 milliards, sont demeurés au même niveau qu'en mai. Cela contraste avec les fortes augmentations mensuelles moyennes de 1.4% enregistrées en avril et mai. Les stocks détenus s'établissaient à $41.0 milliards, inchangé depuis mai. Une augmentation de 0.9% dans les matières premières a été contrebalancée par des baisses de 0.9% dans les produits en cours et de 0.2% dans les produits finis.

- Le **rapport des stocks aux livraisons** était en baisse, passant de 1.55:1 en mai à 1.54:1 en juin, suite à une croissance supérieure des livraisons comparativement à celle des stocks. Le rapport des produits finis aux livraisons est passé de 0.54:1 à 0.53:1 en juin.

- Des augmentations relativement fortes au cours des deux derniers mois ont amené les **commandes en carnet** à un nouveau sommet de $27.8 milliards. Dans les industries des biens durables, les commandes en carnet étaient en hausse de 1.1% à $25.6 milliards.

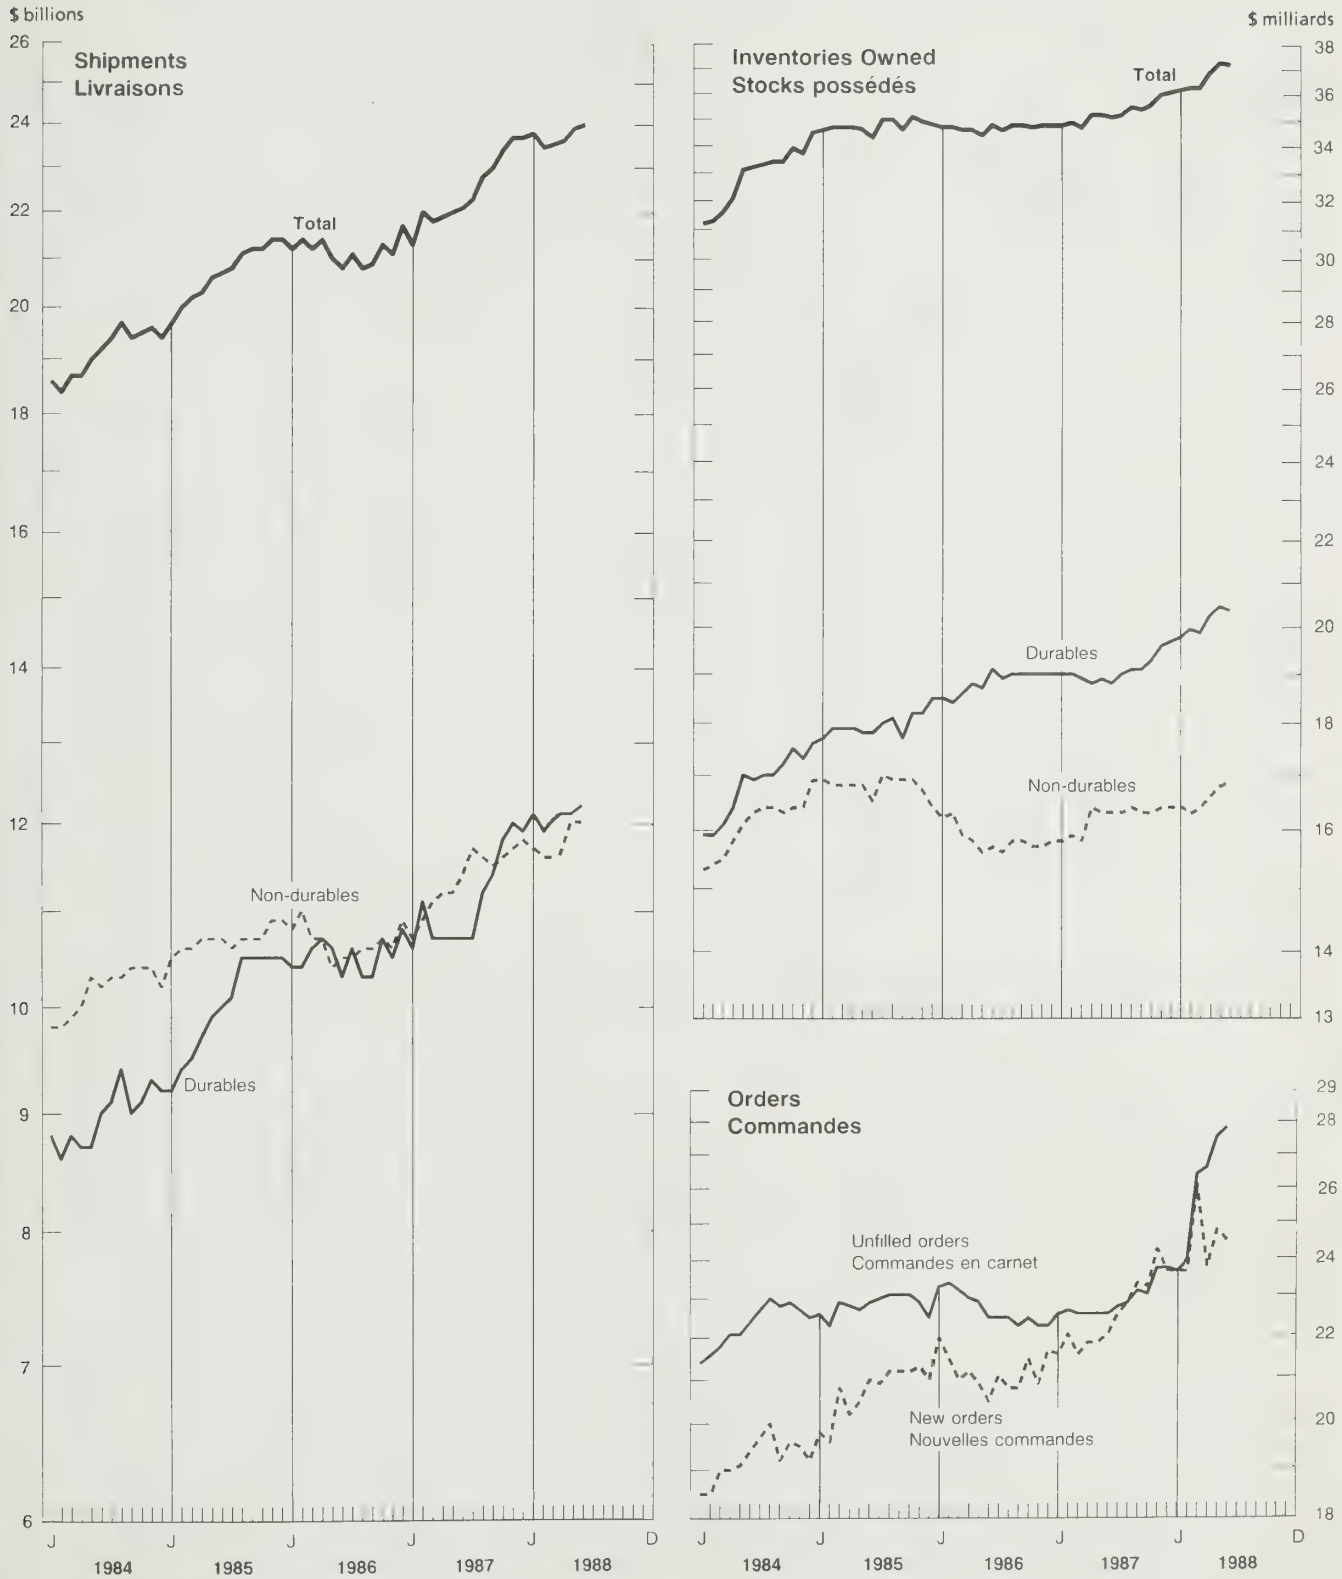
- Après une hausse marquée en mai, les **nouvelles commandes** ont diminué de 1.5% en juin pour atteindre un niveau de $24.5 milliards. Bien que les industries du matériel de transport aient chuté substantiellement, les nouvelles commandes pour les autres industries ont montré une forte augmentation pour un troisième mois consécutif.

**Avant désaisonnalisation**

- On a estimé à $26.0 milliards les livraisons des manufacturiers en juin 1988 ce qui représente une augmentation de 9.5% par rapport au niveau de juin 1987.

- Pour les six premiers mois de 1988, les livraisons estimatives ont totalisé $144.9 milliards, soit un gain de 9.8% par rapport à la période correspondante en 1987.

## Note to Data Users



Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

## Note aux utilisateurs

Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries ou des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

## FOOTNOTES

### Tables 1 and 5

(1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.

(2) The value for total shipments contains three industries where "production" is used instead of shipments. Please see concepts and methods, 7th paragraph for more details.

### Tables 2 to 4

(1) Series which contain no significant seasonality include:

**Raw Materials**

Rubber Products Industries,
Primary Textile Industries,
Refined Petroleum and Coal Products Industries

**Goods in Process**

Tobacco Products Industries

**Unfilled Orders**

Plastic Products Industries,
Machinery Industries (Except Electrical Machinery)
Transportation Equipment Industries

Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

### Table 6

(1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 7th paragraph.

(2) From January 1983 onwards, the data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

**Note:** Figures may not add due to rounding.

## NOTES

### Tableaux 1 et 5

(1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.

(2) La valeur des livraisons totales contient trois industries ou la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

### Tableaux 2 à 4

(1) Les séries qui sont peu sensibles aux variations saisonnières incluent:

**Matières premières**

Industries des produits en caoutchouc
Industries textiles de première transformation
Industries des produits raffinés du pétrole et du charbon

**Produits en cours**

Industries du tabac

**Commandes en carnet**

Industries des produits en matière plastique,
Industries de la machinerie (sauf électrique)

Industries du matériel de transport

Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimes entre les séries sont attribuables à la technique d'arrondissement utilisée.

### Tableau 6

(1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 7ième paragraphe des concepts et méthodes.

(2) Depuis janvier 1983, les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

**Nota:** Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

## CONCEPTS AND METHODS

### Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1984 and 1985 Censuses. Values for years prior to 1984 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1985 are projections, these totals are subject to adjustment when more recent census data become available.

For current periods, deaths, when they have been verified, are removed from the sample. Large births are added to the estimates as we become aware of them through press or manufacturing association sources. Small births have a minor impact on manufacturing data and are incorporated during the annual benchmarking process as described above.

Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

## CONCEPTS ET MÉTHODES

### Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient cette publication sont ajustées en fonction des recensements de 1984 et 1985. Les chiffres pour les années jusqu'à 1984 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1985 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes.

Pour les périodes courantes, les disparitions d'entreprises après avoir fait l'objet d'une vérification, sont retirées de l'échantillon. Les créations d'importantes entreprises sont additionnées aux estimations aussitôt que nous connaissons la création de telles entreprises par les médias d'information ou par des sources d'associations manufacturières. Les créations de petites entreprises ont un impact mineur sur les données manufacturières et sont incorporées durant le processus annuel de rajeunissement tel que décrit plus haut.

Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est revisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

## Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stock and ships. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

In order to reduce the distortion in the shipments of the three above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

## Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

## Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. À cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant et les bateaux. À mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

Afin de réduire la distorsion qui surviendrait dans les trois industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

## Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

## Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceeding three months are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

## Definitions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

## Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,
Application Consulting Section,
Statistics Canada,
Ottawa, Ontario, K1A 0Z8

## Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

## Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

## Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révise les estimations pour les trois mois précédents afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

## Définitions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

## Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,
Section de consultants aux applications,
Statistique Canada,
Ottawa (Ontario) K1A 0Z7

## Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrance du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

## Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

## The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to sub-divide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

## Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

# 1986 Census Profiles

# Les Profils du recensement de 1986

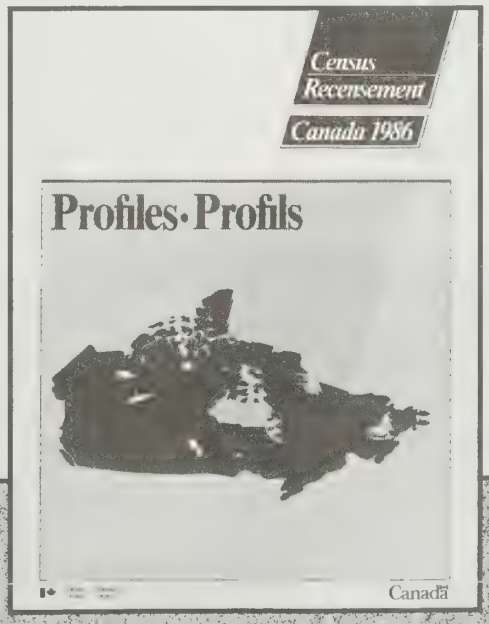
## Your Ticket to any Community in Canada

## Votre laissez-passer pour mieux connaître les Canadiens

The 1986 Profiles will put you on the fast track to any Canadian community you want to study

You're looking for a fast introduction to the social and demographic realities of a city, a town, a municipality or an entire province. And you don't have the time to wade through piles of statistics.

Focus in on the area of your choice with a CENSUS PROFILE. Each PROFILE features more than 46 items of information on the area that interests you . . . from population counts, to the living arrangements of its elderly.



Choose a PROFILE on any one of

- 6009 Census Subdivisions (municipalities)
- 266 Census Divisions (counties)
- 282 Federal Electoral Districts
- 25 Census Metropolitan Areas
- 114 Census Agglomerations
- a variety of urban/rural breakdowns
- and, more.

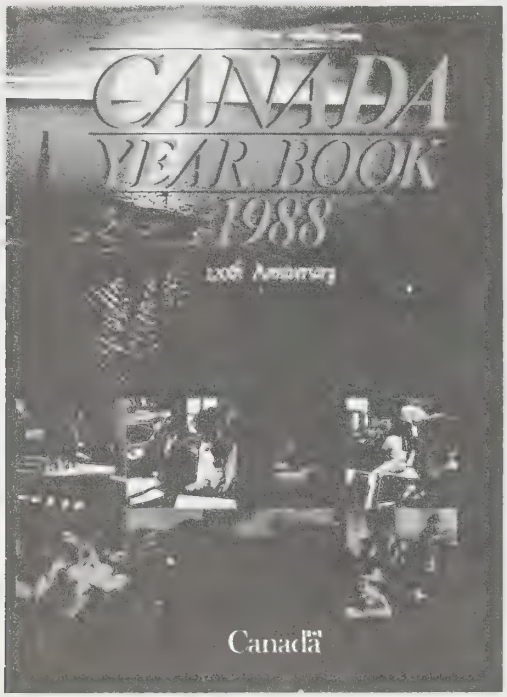
With 52 publications in this series, we can fast track you to any destination you want.

For more information, call us at 1-800-267-6677 and request the Census brochure (which includes ordering information), or write us at:

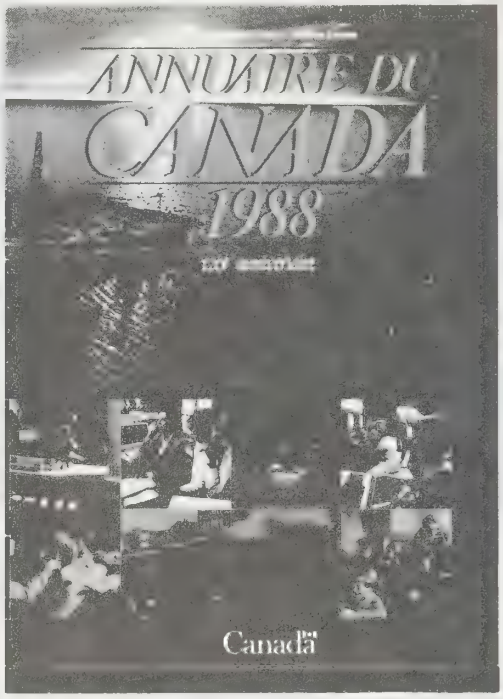
**Publications Sales**
**Statistics Canada**
**Ottawa, Ontario**
**K1A 0T6**

Le Canada et ses régions sont à votre portée grâce aux Profils du recensement de 1986.

Vous désirez connaître le portrait socio-démographique d'une province, d'une ville ou d'une municipalité en particulier, mais la perspective d'avoir à vous battre avec des montagnes de statistiques vous effraie?



Balayez toute appréhension! Les Profils du recensement de 1986 vous épargneront temps et effort. Chaque Profil présente plus de 46 éléments différents d'information sur chacune des régions répertoriées. Des chiffres de population aux données sur les modes de vie de la population âgée, vous saurez tout.



Vous n'avez qu'à faire votre choix. Et quel choix! Les 52 publications de la série portent sur:

- 6,009 municipalités (subdivisions de recensement);
- 266 comtés (divisions de recensement);
- 282 circonscriptions électorales fédérales;
- 25 régions métropolitaines de recensement;
- 114 agglomérations de recensement;
- diverses régions urbaines et rurales;
- et plus encore

Pour de plus amples renseignements, composez le 1-800-267-6677 et demandez notre brochure, qui vous renseignera sur les modalités de commande. Ou, si vous le préférez, écrivez à:

# A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting * Demography * Health * Education * Employment and incomes * Social security * Housing and construction * Forests, fish and furs * Agriculture * Mines and minerals * Energy * Science and technology * Transportation * Communications * Cultural activities and leisure * Manufacturing * Merchandising and services * Banking, finance and insurance * Judicial System * External relations, trade and defence * Government * Government finance * Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-6677 or by completing the order coupon included in this publication.

$49.95 plus shipping and handling ($54 inclusive in Canada, $70 other countries); Catalogue number 11-402E.

Information can also be obtained by contacting your Regional Reference Centre.

# TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada* . Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie * Démographie * Santé * Éducation * Emploi et revenu * Sécurité sociale * Logement et construction * Pêches et fourrures * Agriculture * Mines et minéraux * Énergie * Sciences et technologie * Transports * Communications * Activités culturelles et loisirs * Industries manufacturières * Commerce et services * Banques, finances et assurances * Gouvernement * Système judiciaire * Relations extérieures, commerce et défense * Finances publiques * Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-6677 ou en remplissant le bon de commande qui figure dans la présente publication.

$49.95 frais de port et de manutention en sus ($54 au Canada, $70 à l'étranger); numéro 11-402F au répertoire.

Pour de plus amples renseignements, communiquez avec le Centre de consultation de Statistique Canada le plus près de chez vous.

# *INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?*

Then *Canadian Social Trends* is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, *Canadian Social Trends* looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, *Canadian Social Trends* provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, *Canadian Social Trends* also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

# *VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE ?*

Alors *Tendances sociales canadiennes* est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, *Tendances sociales canadiennes* brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

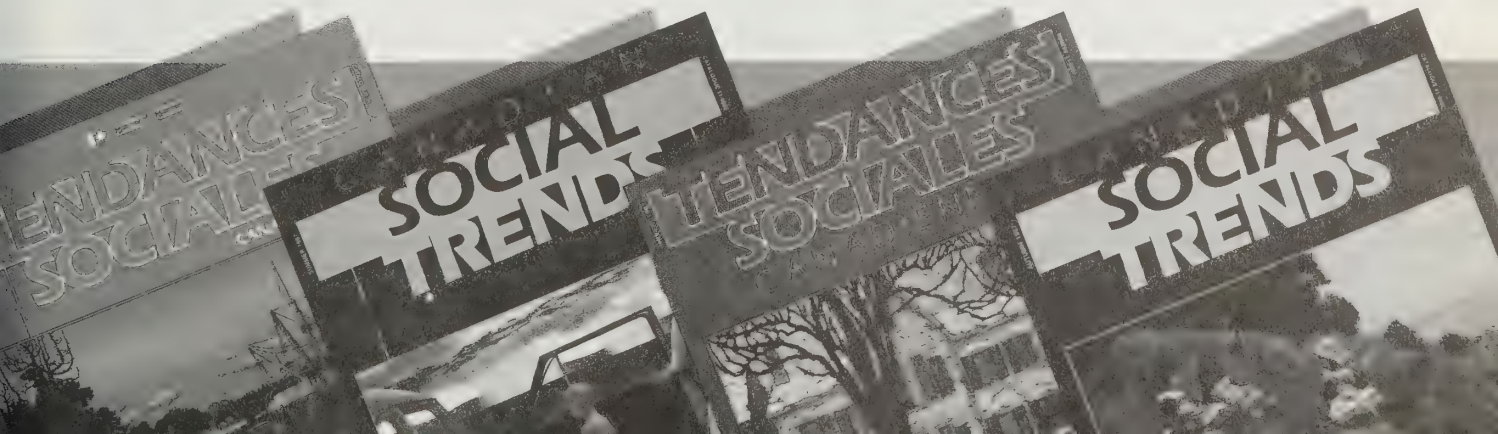
Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, *Tendances sociales canadiennes* dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

*Tendances sociales canadiennes* présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

## CANADIAN SOCIAL TRENDS

Catalogue No. 11-008E is available for $8.00 per copy/$32.00 annually (in Canada); $9.00 per copy/$36.00 annually (elsewhere); students 30% discount from:

**Publication Sales,**
**Statistics Canada,**
**Ottawa, Ontario K1A 0T6**
**Telephone: 1-800-267-6677**



Prices include postage and handling costs. Payment should be made in Canadian dollars or equivalent funds. ($7 U.S. per issue/$28 U.S. annually)

## TENDANCES SOCIALES CANADIENNES

(Numéro 11-008F au répertoire) est publiée quatre fois l'an et se vend $8 l'exemplaire ou $32 l'abonnement annuel au Canada et $9 l'exemplaire ou $36 l'abonnement annuel à l'étranger (étudiants: 30% de rabais). Vous pouvez vous procurer cette revue en vous adressant à:

**Vente des publications**
**Statistique Canada**
**Ottawa (Ontario)**
**K1A 0T6**
**Téléphone: 1-800-267-6677**

Les prix incluent les frais de port et de manutention. Les paiements doivent être faits en dollars canadiens ou l'équivalent ($US 28 l'abonnement annuel; $US 7 l'exemplaire).

# Every week

## The numbers that make decisions

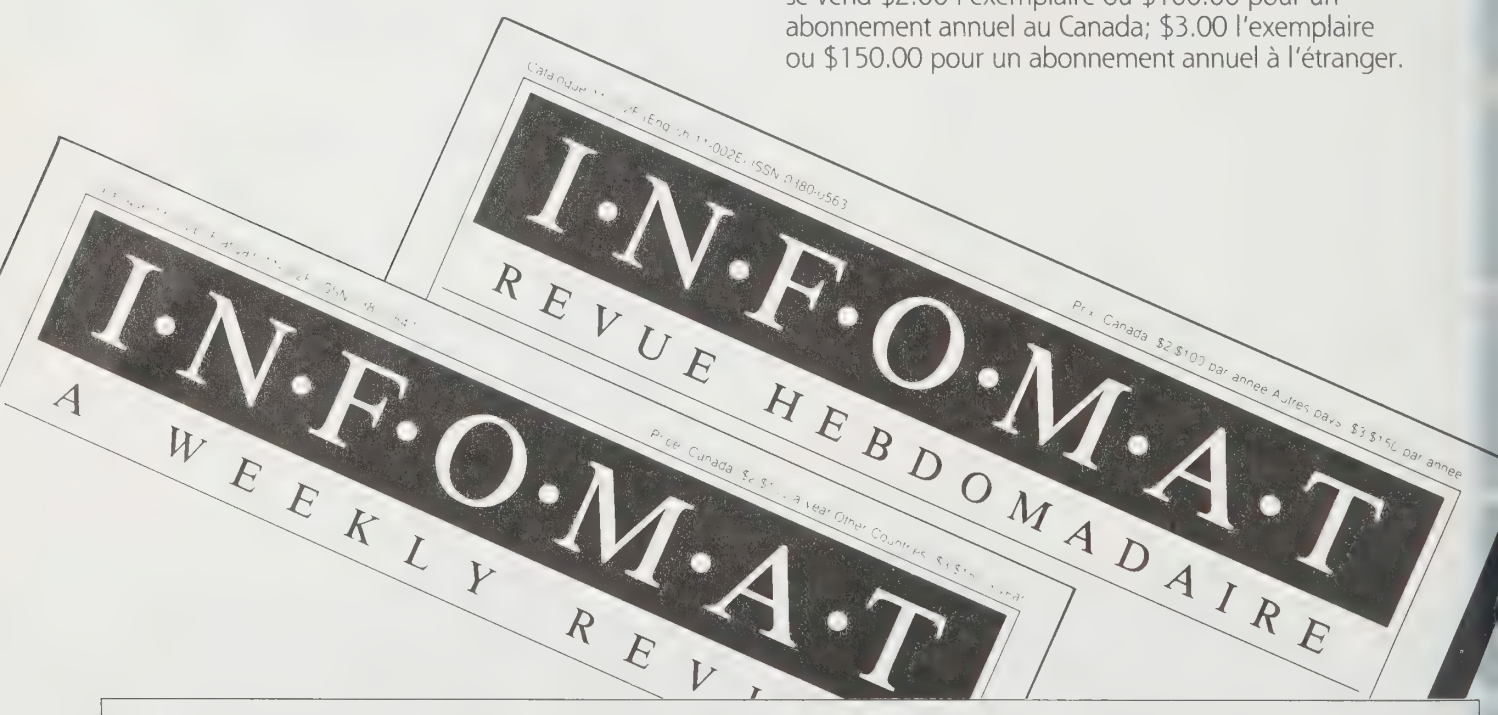
## The data that highlight national economic trends

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat,* Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere).

# Toutes les semaines



## Les chiffres qui font les décisions

## Les données illustrant les tendances de l'économie canadienne

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat,* n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger.

JULY 1988

# MONTHLY SURVEY OF MANUFACTURING

**Shipments, Inventories and Orders projected from the 1984 and 1985 Census of Manufactures benchmarks.**

## HIGHLIGHTS

SEASONALLY ADJUSTED

- Shipments returned to the February 1988 level, with a decrease of 2.1% to $23.5 billion in July 1988.
- July inventories of $37.4 billion increased 0.8% from June.
- The inventory to shipments ratio was up from 1.54:1 in June to 1.59:1 in July 1988.
- Unfilled orders increased 1.2% in July to $27.8 billion, following strong increases in the two previous months.

For the complete text and charts, please refer to the accompanying Statistics Canada Daily.

JUILLET 1988

# ENQUETE MENSUELLE SUR LES INDUSTRIES MANUFACTURIERES

**Livraisons, Stocks et Commandes. Projections effectuées à partir des données de référence du recensement des manufactures de 1984 et 1985.**

## FAITS SAILLANTS

DESAISONNALISEES

- La valeur des livraisons est revenue au niveau de celui de février 1988, à la suite d'une diminution de 2.1% à $23.5 milliards en juillet 1988.
- Les stocks en juillet ont augmenté de 0.8% pour atteindre $37.4 milliards.
- Le rapport des stocks aux livraisons était en hausse, passant de 1.54:1 en juin à 1.59:1 en juillet 1988.
- Les commandes en carnet ont augmenté de 1.2% en juillet pour atteindre $27.8 milliards, faisant suite à de fortes augmentations dans les deux mois précedents.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accomodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou,** Director, Industry Division.
- **Basil McCormick,** Assistant Director, Industry Division.
- **Henry Glouchkow,** Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations que'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques componantes peuvent ne pas correspondre exactment du total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthods, voulez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou,** Directeur, Division de l'industrie.
- **Basil McCormick,** Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow,** Chef, Enquête mensuel sur les industries manufacturières.

FOOTNOTES

**Tables 4 to 6, 9, 10, 13, 14**

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

**Table 15**

Inventory owned is not available

**Table 17**

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

MESSAGES

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

NOTES

**Tableaux 4 à 6, 9, 10, 13 et 14**

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

**Tableau 15**

Les stocks possédés ne sont pas disponibles.

**Tableau 17**

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

AVIS

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduits en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.

Statistics Canada Statistique Canada

AUGUST 1988

# MONTHLY SURVEY OF MANUFACTURING

LIBRARY
1 4 1988
University of Toronto

**Shipments, Inventories and Orders projected from the 1984 and 1985 Census of Manufactures benchmarks.**

## HIGHLIGHTS

SEASONALLY ADJUSTED

- Shipments in August 1988 increased 2.8% to $24.0 billion, thus recovering virtually all of the decrease in July.

- August inventories of $37.4 billion increased 0.5% from July. Increases averaging 0.5% a month during the last year have continued to push inventories to new highs.

- The inventory to shipments ratio declined from 1.59:1 in July to 1.56:1 in August 1988, because shipments increased more than inventories.

- Unfilled orders increased 0.5% in August to a level of $27.7 billion.

For the complete text and charts, please refer to the accompanying Statistics Canada Daily.

AOUT 1988

# ENQUETE MENSUELLE SUR LES INDUSTRIES MANUFACTURIERES

**Livraisons, Stocks et Commandes. Projections effectuées à partir des données de référence du recensement des manufactures de 1984 et 1985.**

## FAITS SAILLANTS

DESAISONNALISEES

- Les livraisons manufacturières pour août 1988 à $24.0 milliards ont augmentées de 2.8% et ont récupérées virtuellement toute la baisse de juillet.

- Les stocks à $37.4 milliards ont augmentés de 0.5% comparativement à juillet. Des augmentations moyennes de 0.5% par mois au cours de la dernière année ont contribuées à amener les stocks à de nouveaux sommets.

- Le rapport des stocks aux livraisons est passé de 1.59:1 en juillet à 1.56:1 en août 1988, du fait que les livraisons ont augmentées plus que les stocks.

- Les commandes en carnet ont augmentées de 0.5% en août pour atteindre un niveau de $27.7 milliards.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accomodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou**, Director, Industry Division.
- **Basil McCormick**, Assistant Director, Industry Division.
- **Henry Glouchkow**, Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations que'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques componantes peuvent ne pas correspondre exactment du total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthods, voulez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou**, Directeur, Division de l'industrie.
- **Basil McCormick**, Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow**, Chef, Enquête mensuel sur les industries manufacturières.

FOOTNOTES

Tables 4 to 6, 9, 10, 13, 14

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

Table 15

Inventory owned is not available

Table 17

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

MESSAGES

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

NOTES

Tableaux 4 à 6, 9, 10, 13 et 14

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

Tableau 15

Les stocks possédés ne sont pas disponibles.

Tableau 17

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

AVIS

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduits en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.

# ENQUÊTE MENSUELLE SUR LES INDUSTRIES MANUFACTURIÈRES

## SEPTEMBRE 1988

Livraisons, Stocks et Commandes. Projections effectuées à partir des données de référence du recensement des manufactures de 1984 et 1985.

### FAITS SAILLANTS

DESAISONNALISES

- Les livraisons, les stocks et les commandes en carnet ont atteint de nouveaux sommets en septembre 1988.
- Malgré les récentes augmentations dans les livraisons, le rapport des stocks aux livraisons est en hausse légèrement comparé aux bas niveaux records observés au tournant de l'année.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou,** Director, Industry Division.
- **Basil McCormick,** Assistant Director, Industry Division.
- **Henry Glouchkow,** Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques composantes peuvent ne pas correspondre exactment au total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthodes, veuillez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou,** Directeur, Division de l'industrie.
- **Basil McCormick,** Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow,** Chef, Enquête mensuelle sur les industries manufacturières.

## Manufacturers' Inventories Shipments and Unfilled Orders, 1986-1988
## Les stocks, les livraisons, et les commandes en carnet des manufacturiers, 1986-1988

## Monthly Survey of Manufacturing
September 1988

### Seasonally Adjusted

Shipments, inventories and unfilled orders hit new highs in September 1988. Despite recent increases in shipments, the inventories to shipments ratio is up slightly from record lows at the turn of the year.

### Highlights

- Preliminary estimates indicate that Canadian manufacturers' September 1988 **shipments** increased 1.0% to $24.4 billion, thus reaching a new high for a second consecutive month. With substantial increases in the last two months outweighing a drop in July, the short term trend has grown at close to 0.5% a month over the last four months. This contrasts with weaker growth at the beginning of the year. Transportation equipment, food; and chemical products industries were the major contributors to the September increase.

- September **inventories** of $37.9 billion increased 0.8% from August, thus continuing to post new highs. The trend has also been increasing slightly faster in the last few months. Chemical products and primary metal industries were the major contributors to the September increase.

- The **inventories to shipments ratio** for September at 1.55:1 showed a slight decrease from the August level of 1.56:1. Despite the increases for shipments in August and September, the ratio remains higher than the low of 1.52:1 recorded from October 1987 to January 1988.

- **Unfilled orders** increased 0.9% in September to a level of $28.3 billion. This is the second time in as many months that unfilled orders have surpassed the $28 billion level. Increases have averaged 1% a month in the last four months.

- Following decreases in June and July, **new orders** increased for a second month in a row to reach $24.7 billion, up 0.9%.

### Unadjusted

- Manufacturers' shipments in September 1988 were estimated at $25.5 billion, 5.7% higher than the September 1987 level.

- Cumulative shipments for the first nine months of 1988 were estimated at $215.6 billion, 8.3% higher than the value for the corresponding period in 1987.

## Enquête mensuelle sur les industries manufacturières
Septembre 1988

### Après désaisonnalisation

- Les livraisons, les stocks et les commandes en carnet ont atteint de nouveaux sommets en septembre 1988. Malgré les récentes augmentations dans les livraisons, le rapport des stocks aux livraisons est en hausse légèrement comparé aux bas niveaux records observés au tournant de l'année.

### Faits saillants

- Des estimations préliminaires indiquent que la valeur des **livraisons** des manufacturiers canadiens a augmenté de 1.0% pour atteindre $24.4 milliards, atteignant ainsi un nouveau sommet pour un second mois consécutif. Avec des augmentations substantielles dans les deux derniers mois contrebalan ant la chute de juillet, la tendance à court terme a affiché une croissance de près de 0.5% par mois au cours des quatre derniers mois. Cette situation contraste avec la faible croissance observée au début de l'année. Les industries du matériel de transport, des aliments; et des produits chimiques ont contribué le plus à l'augmentation de septembre.

- Les **stocks** de septembre, à un niveau de $37.9 milliards, ont augmenté de 0.8% par rapport à août, continuant ainsi a afficher de nouveaux sommets. La tendance a également augmenté légèrement au cours des derniers mois. Les industries des produits chimiques et de première transformation des métaux ont contribué le plus à l'augmentation de septembre.

- Le **rapport des stocks aux livraisons** pour septembre est passé à 1.55:1, montrant une légère diminution comparativement au niveau d'août de 1.56:1. Malgré les augmentations des livraisons en août et septembre, le rapport est demeuré plus élevé que le bas niveau de 1.52:1 enregistré d'octobre 1987 à janvier 1988.

- Les **commandes en carnet** ont augmenté de 0.9% en septembre pour atteindre un niveau de $28.3 milliards. C'est la deuxième fois en autant de mois que les commandes en carnet ont dépassé le cap des $28 millards. Les augmentations ont affiché en moyenne une croissance de 1.0% mensuellement dans les quatre derniers mois.

- Après des baisses en juin et juillet, les **nouvelles commandes** ont augmenté pour un second mois consécutif pour atteindre $24.7 milliards, en hausse de 0.9%.

### Avant désaisonnalisation

- On a estimé à $25.5 milliards les livraisons des manufacturiers en septembre 1988 ce qui représente une augmentation de 5.7% par rapport au niveau de septembre 1987.

- Pour les neuf premiers mois de 1988, les livraisons estimatives ont totalisé $215.6 milliards, soit un gain de 8.3% par rapport à la période correspondante en 1987.

Available on CANSIM: Matrices 9550-9580.

**Note**: Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

Data for shipments by province in greater detail than normally published may be available on request. For further information, please contact Donald Dubreuil (613-951-9497) or the Monthly Survey of Manufacturing Section (613-951-9832), Industry Division.

Disponible sur CANSIM dans les matrices 9550-9580.

**Note**: Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries ou des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

Certaines séries des livraisons par province qui ne sont pas publiées, pourraient être disponibles sur demande. Pour plus d'information, veuillez contacter Donald Dubreuil, agent d'information, (613-951-9497) ou la section de l'enquête mensuelle sur les industries manufacturières (613-951-9832), Division de l'industrie.

FOOTNOTES

Tables 4 to 6, 9, 10, 13, 14

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

Table 15

Inventory owned is not available

Table 17

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

MESSAGES

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the total Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

NOTES

Tableaux 4 à 6, 9, 10, 13 et 14

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

Tableau 15

Les stocks possédés ne sont pas disponibles.

Tableau 17

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

AVIS

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduit en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.

# MONTHLY SURVEY OF MANUFACTURING

## OCTOBER 1988

Shipments, Inventories and Orders projected from the 1984 and 1985 Census of Manufactures benchmarks.

## HIGHLIGHTS

Seasonally Adjusted

- Shipments and inventories were down slightly in October 1988. However their short term trends continued to grow at close to 0.5% a month.

- Unfilled orders declined 0.4% in October, the first decline in nine months. The trend continued to increase, but at a slower pace than the peak increases recorded in March and April 1988.

## FAITS SAILLANTS

Désaisonnalisés

- Les livraisons et les stocks étaient légèrement en baisse en octobre 1988. Quoi qu'il en soit, leurs tendances à court terme ont continué à croître de près de 0.5% par mois.

- Les commandes en carnet ont diminué de 0.4% en octobre, la première diminution en neuf mois. La tendance a continué à augmenter, mais à un rythme moindre que les sommets dans les augmentations enregistrés en mars et avril 1988.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou,** Director, Industry Division.
- **Basil McCormick,** Assistant Director, Industry Division.
- **Henry Glouchkow,** Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques composantes peuvent ne pas correspondre exactment au total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthodes, veuillez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou,** Directeur, Division de l'industrie.
- **Basil McCormick,** Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow,** Chef, Enquête mensuelle sur les industries manufacturières.

## Manufacturers' Inventories, Shipments and Unfilled Orders, 1986-1988
## Les stocks, les livraisons, et les commandes en carnet des manufacturiers, 1986-1988

**Monthly Survey of Manufacturing**
October 1988

**Seasonally Adjusted**

Shipments and inventories were down slightly in October 1988. However their short term trends continued to grow at close to 0.5% a month. Unfilled orders declined 0.4% in October, the first decline in nine months. The trend continued to increase, but at a slower pace than the peak increases recorded in March and April 1988.

**Highlights**

- Preliminary estimates indicate that Canadian manufacturers' October 1988 **shipments** declined slightly by 0.1% to $24.4 billion. This followed a healthy increase of 1.1% in September. As a result the short term trend continued to increase at close to 0.5% a month for the fifth month in a row. In October decreases for food, transportation equipment and non-metallic mineral product industries were mostly offset by increases for tobacco and wood industries.

- October **inventories** declined for the first time in seven months with a slight decrease of 0.1% to $37.8 billion. Increases in the trend for inventories are down from 0.7% a month in May and June 1988 to 0.4% in September. Tobacco products and electrical and electronic products industries were the major contributors to the October decrease.

- The October **inventories to shipments ratio** remained at 1.55:1. The trend for the ratio has remained at 1.55:1 for the last five months, up a few notches from record lows of 1.52:1 recorded at the end of 1987.

- **Unfilled orders** declined for the first time in nine months to $28.2 billion, down 0.4%. The rate of growth in the trend has been declining for five months from a peak increase of 2.6% a month in March and April 1988 down to 0.7% in September.

- **New orders** were down 1.5% to $24.3 billion following increases in August and September.

**Unadjusted**

- Manufacturers' shipments in October 1988 were estimated at $25.0 billion, 2.3% higher than the October 1987 level.

- Cumulative shipments for the first ten months of 1988 were estimated at $240.7 billion, 7.7% higher than the value for the corresponding period in 1987.

**Enquête mensuelle sur les industries manufacturières**
Octobre 1988

**Après désaisonnalisation**

Les livraisons et les stocks étaient légèrement en baisse en octobre 1988. Quoi qu'il en soit, leurs tendances à court terme ont continué à croître de près de 0.5% par mois. Les commandes en carnet ont diminué de 0.4% en octobre, la première diminution en neuf mois. La tendance a continué à augmenter, mais à un rythme moindre que les sommets dans les augmentations enregistrés en mars et avril 1988.

**Faits saillants**

- Des estimations préliminaires indiquent que la valeur des **livraisons** d'octobre 1988 des manufacturiers canadiens a diminué légèrement de 0.1% pour atteindre $24.4 milliards. Cela fait suite à une vigoureuse augmentation de 1.1% en septembre. Comme résultat, la tendance à court terme a continué à augmenter de près de 0.5% mensuellement pour un cinquième mois consécutif. En octobre, des diminutions dans les industries des aliments, du matériel de transport et des produits de première transformation des métaux ont été presque contrebalancées par des augmentations dans les industries du tabac et du bois.

- Les **stocks** d'octobre ont diminué pour une première fois en sept mois, montrant une légère baisse de 0.1% pour se situer à $37.8 milliards. Les augmentations de la tendance pour les stocks sont en baisse, passant de 0.7% par mois en mai et juin 1988 à 0.4% en septembre. Les industries du tabac et des produits électriques et électroniques contribuaient le plus à la baisse d'octobre.

- Le **rapport des stocks aux livraisons** d'octobre est demeuré à 1.55:1. La tendance pour le ratio est demeurée à 1.55:1 pour les cinq derniers mois, en hausse de quelques centièmes des bas niveaux records de 1.52:1 enregistrés à la fin de 1987.

- Les **commandes en carnet** ont diminué pour la première fois en neuf mois à $28.2 milliards, en baisse de 0.4%. Le taux de croissance pour la tendance montre une pente descendante pour cinq mois, passant d'un sommet d'augmentation de 2.6% par mois en mars et avril 1988 à 0.7% en septembre.

- Les **nouvelles commandes** sont en baisse de 1.5% à $24.3 milliards, faisant suite à des augmentations en août et septembre.

**Avant désaisonnalisation**

- On a estimé à $25.0 milliards les livraisons des manufacturiers en octobre 1988, ce qui représente une augmentation de 2.3% par rapport au niveau d'octobre 1987.

- Pour les dix premiers mois de 1988, les livraisons estimatives ont totalisé $240.7 milliards, soit un gain de 7.7% par rapport à la période correspondante en 1987.

Available on CANSIM: Matrices 9550-9580.

**Note:** Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

Data for shipments by province in greater detail than normally published may be available on request. For further information, please contact Donald Dubreuil (613-951-9497) or the Monthly Survey of Manufacturing Section (613-951-9832), Industry Division.

Disponible sur CANSIM dans les matrices 9550-9580.

**Note:** Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries ou des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

Certaines séries des livraisons par province qui ne sont pas publiées, pourraient être disponibles sur demande. Pour plus d'information, veuillez contacter Donald Dubreuil, agent d'information, (613-951-9497) ou la section de l'enquête mensuelle sur les industries manufacturières (613-951-9832), Division de l'industrie.

**FOOTNOTES**

**Tables 4 to 6, 9, 10, 13, 14**

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

**Table 15**

Inventory owned is not available

**Table 17**

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

**MESSAGES**

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the total Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

**NOTES**

**Tableaux 4 à 6, 9, 10, 13 et 14**

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

**Tableau 15**

Les stocks possédés ne sont pas disponibles.

**Tableau 17**

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

**AVIS**

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduit en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.

# MONTHLY SURVEY OF MANUFACTURING

## NOVEMBER 1988

Shipments, Inventories and Orders projected from the 1984 and 1985 Census of Manufactures benchmarks.

### HIGHLIGHTS

Seasonally Adjusted

- Shipments were down, while unfilled orders jumped in November 1988.
- The rate of growth in the short term trend for manufacturing shipments and inventories has been slowing since July 1988. The inventory to shipments ratio has continued on a gentle upward trend since the end of 1987.

# ENQUÊTE MENSUELLE SUR LES INDUSTRIES MANUFACTURIÈRES

## NOVEMBRE 1988

Livraisons, Stocks et Commandes. Projections effectuées à partir des données de référence du recensement des manufactures de 1984 et 1985.

### FAITS SAILLANTS

Après désaisonnalisation

- Les livraisons étaient en baisse, tandis que les commandes en carnet effectuaient un bond en novembre 1988.
- Le taux de croissance de la tendance à court terme pour les livraisons et les stocks manufacturiers est allé en diminuant depuis juillet 1988. Le rapport des stocks aux livraisons a continué de suivre une faible tendance à la hausse depuis la fin de 1987.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou,** Director, Industry Division.
- **Basil McCormick,** Assistant Director, Industry Division.
- **Henry Glouchkow,** Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques composantes peuvent ne pas correspondre exactment au total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthodes, veuillez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou,** Directeur, Division de l'industrie.
- **Basil McCormick,** Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow,** Chef, Enquête mensuelle sur les industries manufacturières.

## Manufacturers' Inventories, Shipments and Unfilled Orders, 1986-1988
## Les stocks, les livraisons, et les commandes en carnet des manufacturiers, 1986-1988

## Monthly Survey of Manufacturing
November 1988

### Seasonally Adjusted

Shipments were down, while unfilled orders jumped in November 1988. The rate of growth in the short term trend for manufacturing shipments and inventories has been slowing since July 1988. The inventory to shipments ratio has continued on a gentle upward trend since the end of 1987.

### Highlights

- Preliminary estimates indicate that Canadian manufacturers' **shipments** declined for a second consecutive month with a decrease of 1.1% to $24.2 billion in November 1988. The rate of growth in the short term trend continued to slow down from increases of 0.5% a month in June and July 1988 to 0.2% in October. Decreases in Transportation Equipment and Tobacco Products Industries accounted for most of the decline in November.

- November **inventories** with an increase of 0.6% reached a record high of $38.1 billion. However, increases in the trend for inventories have slowed down from 0.7% a month in May and June 1988 to 0.4% in October. The Electrical and Electronic Products Industry was the major contributor to the November increase.

- The **inventories to shipments ratio** for November increased to 1.58:1. After remaining steady at 1.55:1 from May to August 1988, the trend for the ratio now stands at 1.56:1 in October.

- **Unfilled orders** jumped 2.3% in November to $28.8 billion, following a decrease in October. The main contributors to the November increase were the aircraft and railroad rolling stock components of the Transportation Equipment Industries major group.

- **New orders** were up 2.3% to $24.8 billion following a decrease of 1.7% in October.

### Unadjusted

- Manufacturers' shipments in November 1988 were estimated at $25.0 billion, 4.4% higher than the November 1987 level.

- Cumulative shipments for the first eleven months of 1988 were estimated at $265.8 billion, 7.4% higher than the value for the corresponding period in 1987.

Available on CANSIM: Matrices 9550-9580.

## Enquête mensuelle sur les industries manufacturières
Novembre 1988

### Après désaisonnalisation

Les livraisons étaient en baisse, tandis que les commandes en carnet effectuaient un bond en novembre 1988. Le taux de croissance de la tendance à court terme pour les livraisons et les stocks manufacturiers est allé en diminuant depuis juillet 1988. Le rapport des stocks aux livraisons a continué de suivre une faible tendance à la hausse depuis la fin de 1987.

### Faits saillants

- Des estimations préliminaires indiquent que la valeur des **livraisons** a diminué pour un second mois consécutif, avec une baisse de 1.1%, pour atteindre $24.2 milliards en novembre 1988. Le taux de croissance dans la tendance à court terme a continué à diminuer, passant d'augmentations de 0.5% par mois en juin et juillet à 0.2% en octobre. Des diminutions dans les industries du matériel de transport et des produits du tabac contribuaient le plus à la baisse de novembre.

- Les **stocks** de novembre avec une hausse de 0.6% ont atteint un nouveau sommet de $38.1 milliards. Quoi qu'il en soit, les augmentations dans la tendance pour les stocks ont ralenti, passant de 0.7% par mois en mai et juin 1988 à 0.4% en octobre. L'industrie des produits électriques et électroniques a contribué le plus à l'augmentation de novembre.

- Le **rapport des stocks aux livraisons** pour novembre a augmenté à 1.58:1. Après avoir demeuré stable à 1.55:1 de mai à août 1988, la tendance pour le rapport s'établit maintenant à 1.56:1 en octobre.

- Les **commandes en carnet** effectuaient un bond de 2.3% en novembre pour atteindre $28.8 milliards, faisant suite à une diminution en octobre. La majeure partie de l'augmentation de novembre provenait des industries des aéronefs et du matériel ferroviaire roulant, composantes du grand groupe 'Industries du matériel de transport'.

- Les **nouvelles commandes** étaient en hausse de 2.3% à $24.8 milliards, faisant suite à une baisse de 1.7% en octobre.

### Avant désaisonnalisation

- On a estimé à $25.0 milliards les livraisons des manufacturiers en novembre 1988, ce qui représente une augmentation de 4.4% par rapport au niveau de novembre 1987.

- Pour les onze premiers mois de 1988, les livraisons estimatives ont totalisé $265.8 milliards, soit un gain de 7.4% par rapport à la période correspondante en 1987.

Disponible sur CANSIM dans les matrices 9550-9580.

**Note:** Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

Data for shipments by province in greater detail than normally published may be available on request. For further information, please contact Donald Dubreuil (613-951-9497) or the Monthly Survey of Manufacturing Section (613-951-9832), Industry Division.

**Note:** Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries ou des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

Certaines séries des livraisons par province qui ne sont pas publiées, pourraient être disponibles sur demande. Pour plus d'information, veuillez contacter Donald Dubreuil, agent d'information, (613-951-9497) ou la section de l'enquête mensuelle sur les industries manufacturières (613-951-9832), Division de l'industrie.

FOOTNOTES

**Tables 4 to 6, 9, 10, 13, 14**

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

**Table 15**

Inventory owned is not available

**Table 17**

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

MESSAGES

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the total Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

NOTES

**Tableaux 4 à 6, 9, 10, 13 et 14**

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

**Tableau 15**

Les stocks possédés ne sont pas disponibles.

**Tableau 17**

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

AVIS

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduit en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

In the following tables, some components may not add exactly to the total, because of rounding.

For a more complete description of concepts and methods, please refer to the June 1988 issue.

This publication was prepared under the direction of:

- **P. N. Triandafillou**, Director, Industry Division.
- **Basil McCormick**, Assistant Director, Industry Division.
- **Henry Glouchkow**, Chief, Monthly Survey of Manfacturing.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Dans les tableaux qui suivent, quelques composantes peuvent ne pas correspondre exactment au total du fait de l'arrondissement.

Pour une description plus détaillée des concepts et méthodes, veuillez vous référer au numéro de juin 1988.

Cette publication a été rédigée sous la direction de:

- **P. N. Triandafillou**, Directeur, Division de l'industrie.
- **Basil McCormick**, Directeur adjoint, Division de l'industrie.
- **Henry Glouchkow**, Chef, Enquête mensuelle sur les industries manufacturières.

## Manufacturers' Inventories, Shipments and Unfilled Orders, 1986-1988
## Les stocks, les livraisons, et les commandes en carnet des manufacturiers, 1986-1988

## Monthly Survey of Manufacturing
December 1988

### Seasonally Adjusted

Both shipments and unfilled orders reached new highs in December 1988. Shipments rebounded following two consecutive decreases and unfilled orders continued on a steady upward trend.

### Highlights

- Preliminary estimates indicate that Canadian manufacturers' **shipments** increased by 3.4% to $24.9 billion in December 1988,after two consecutive decreases. The rate of growth in the short term trend stabilized at 0.3%, between September and November, after experiencing a declining trend between June 1988 and September. Increases were recorded in 18 of the 22 major groups in December. Transportation Equipment Industries, notably aircraft and parts, and Primary Metals Industries accounted for half of the increase.

- December **inventories** registered a slight decrease of 0.2% to a level of $38.1 billion. Increases in the trend for inventories continued to slow, from 0.7% a month in May and June 1988 to 0.3% in November. Transportation Equipment and Refined Petroleum and Coal Industries were the major contributors to the decrease in December inventories.

- As a result of the large increase in December shipments and the decline in inventories, the **inventories to shipments ratio** for December dropped to 1.53:1 from a level of 1.59:1 in November. The December ratio almost matches the record lows of 1.52:1 registered from October 1987 to January 1988. The trend for the ratio remained stable at 1.56:1 in November.

- **Unfilled orders** increased 1.4% in December to reach a record high of $29.3 billion. The main contributors to the December increase were Fabricated Metal Products and Electrical and Electronic Products Industries. Growth in the trend for unfilled orders remained steady at 0.9% a month from September to November 1988.

- **New orders** were up 2.2% to $25.3 billion following an increase of 1.4% in November.

### Unadjusted

- Manufacturers' shipments in December 1988 were estimated at $22.8 billion, 2.2% higher than the December 1987 level.

## Enquête mensuelle sur les industries manufacturières
Décembre 1988

### Après désaisonnalisation

Les livraisons, ainsi que les commandes en carnet, ont atteint de nouveaux sommets en décembre 1988. Les livraisons ont rebondi à la suite de deux baisses consécutives; et les commandes en carnet ont continué à afficher une tendance constante à la hausse.

### Faits saillants

- Des estimations préliminaires indiquent que la valeur des **livraisons** a augmenté de 3.4% pour atteindre $24.9 milliards en décembre 1988, après deux baisses consécutives. Le taux de croissance de la tendance à court terme s'est stabilisé à 0.3% entre septembre et novembre, après avoir affiché une tendance à la baisse entre juin et septembre 1988. Des augmentations ont été enregistrées dans 18 des 22 grands groupes en décembre. Les industries du matériel de transport, notamment les industries des aéronefs, et les industries de première transformation des méntaux ont contribué de moitié à l'augmentation.

- En décembre, les **stocks** ont enregistré une légère diminution de 0.2% portant le niveau à $38.1 milliards. Les augmentations dans la tendance pour les stocks ont continué à ralentir, passant de 0.7% par mois en mai et juin 1988, à 0.3% en novembre. Les industries du matériel de transport et des produits raffinés du pétrole et du charbon ont contribué le plus à la diminution des stocks en décembre.

- La forte augmentation des livraisons de décembre associé à la diminutions des stocks a résulté en une baisse du **rapport des stocks aux livraisons**, le rapport s'établissant à 1.53:1 comparativement à 1.59:1 en novembre. Le rapport de décembre est sensiblement identique aux bas niveaux records de 1.52:1 enregistrés d'octobre 1987 à janvier 1988. La tendance du rapport est demeuré stable à 1.56:1 en novembre.

- Les **commandes en carnet** ont augmenté de 1.4% en décembre pour atteindre un nouveaux sommet de $29.3 milliards. Les industries ayant contribué le plus à l'augmentation de décembre étaient celles de la fabrication des produits métalliques et des produits électriques et électroniques. La croissance de la tendance pour les commandes en carnet est demeurée constante à 0.9% par mois de septembre à novembre 1988.

- Les **nouvelles commandes** étaient en hausse de 2.2% à $25.3 milliards, après une baisse de 1.4% en novembre.

### Avant désaisonnalisation

- On a estimé les livraisons des manufacturiers à $22.8 milliards en décembre 1988, en hausse de 2.2% par rapport au niveau de décembre 1987.

- Cumulative shipments for 1988 were estimated at $288.5 billion, 6.9% higher than the value in 1987.

Available on CANSIM: Matrices 9550-9580.

**Note:** Inventories referred to in the text above are inventories owned, which exclude inventories for which manufacturers have received payment, but which they are still holding. This occurs for industries where long-term projects are arranged and progress payments are received according to the work done. In these cases, shipments data reflect progress payments rather than deliveries. At the all-industry level, inventory owned accounts for the largest part of inventory held.

Data for shipments by province in greater detail than normally published may be available on request. For further information, please contact Claude Robillard (613-951-3508) or the Monthly Survey of Manufacturing Section (613-951-9832), Industry Division.

- Les données cumulatives pour 1988 de la valeur estimée des livraisons s'établit à $288.5 milliards, soit un gain de 6.9% par rapport à la valeur de 1987.

Disponible sur CANSIM dans les matrices 9550-9580.

**Note:** Les stocks font référence dans le texte ci-haut aux stocks possédés, lesquels excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers. Cette situation survient dans les industries ou des projets à long terme sont planifiés et pour lesquels des paiements sont reçus en relation aux travaux effectués. Dans ces situations, les données des livraisons reflètent les paiements au lieu des livraisons. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des inventaires détenus.

Certaines séries des livraisons par province qui ne sont pas publiées, pourraient être disponibles sur demande. Pour plus d'information, veuillez contacter Michel Labonté, (613-951-9834) ou la section de l'enquête mensuelle sur les industries manufacturières (613-951-9832), Division de l'industrie.

FOOTNOTES

Tables 4 to 6, 9, 10, 13, 14

Trend. A seasonally adjusted series still shows the effects of irregular influences and special circumstances and, these can mask the trend. The **short term trend** is a measure which depicts the underlying direction in the seasonally adjusted series. It is calculated by averaging across months, thus balancing out the effects of irregular influences. The result is a smoother and more stable series. Since a moving average cannot accurately represent the latest month in a time series, the tables showing the change in the trend stop at the second last month.

Table 15

Inventory owned is not available

Table 17

For particular major groups where there are no manufacturing establishments, provincial data will not be shown. The same holds true for major groups which are too small or where data is considered confidential or unreliable.

MESSAGES

Shipments for the Food major group for British Columbia appear to have been overestimated since the beginning of 1986 and should be reduced by about 21%. This translates into a reduction of about 2.3% for Food at the Canada level and 0.3% at the total Canada level. Revised estimates will be published when the series are benchmarked to the 1986 Annual Census of Manufactures.

NOTES

Tableaux 4 à 6, 9, 10, 13 et 14

Tendance. Une série désaisonnalisée montre encore les effets d'irrégularités et de circonstances spéciales; et cela peut masquer la tendance. La **tendance à court terme** est une mesure qui dépeint la direction prise dans une série désaisonnalisée. La tendance est obtenue en effectuant une moyenne à travers les mois et ainsi ces mouvements irréguliers sont amoindris. Le résultat est une série plus lisse et plus stable. Puisqu'une moyenne mobile ne peut représenter fidèlement le dernier mois d'une série chronologique, les tableaux montrant le changement dans la tendance s'arrête à l'avant-dernier mois.

Tableau 15

Les stocks possédés ne sont pas disponibles.

Tableau 17

Pour certains grands groupes, les données provinciales peuvent ne pas être présentes lorsqu'il n'y a pas d'établissements manuturiers ou du fait que les données peuvent être confidentielles/infimes/non fiables.

AVIS

Les livraisons pour le grand groupe "Aliments" pour la Colombie-Britannique semblent avoir été surestimées depuis le début de 1986 et devrait être réduites d'environ 21%. Ceci se traduit en une réduction d'environ 2.3% pour le groupe "Aliment" au niveau du Canada et de 0.3% au niveau du total du Canada. Des estimations revisées seront publiées lorsque les series seront réajustées au recensement annuel des manufactures de 1986.
